Continuous Selections Of Multivalued Mappings 1st Edition:

Continuous Selections of Multivalued Mappings D. Repovš, P. V. Semenov, 2013-04-17 This book is dedicated to the theory of continuous selections of multi valued mappings a classical area of mathematics as far as the formulation of its fundamental problems and methods of solutions are concerned as well as J_n area which has been intensively developing in recent decades and has found various applications in general topology theory of absolute retracts and infinite dimensional manifolds geometric topology fixed point theory functional and convex analysis game theory mathematical economics and other branches of modern mathematics The fundamental results in this theory were laid down in the mid 1950 s by E Michael The book consists of relatively independent three parts Part A Theory Part B Results and Part C Applications We shall refer to these parts simply by their names The target audience for the first part are students of mathematics in their senior year or in their first year of graduate school who wish to get familiar with the foundations of this theory The goal of the second part is to give a comprehensive survey of the existing results on continuous selections of multivalued mappings It is intended for specialists in this area as well as for those who have mastered the material of the first part of the book In the third part we present important examples of applications of continuous selections We have chosen examples which are sufficiently interesting and have played in some sense key role in the corresponding areas of mathematics

Continuous Selections of Multivalued Mappings Dusan Repovš, P. V. Semenov, 2014-01-15 *Continuous Selections of Multivalued Mappings* Dusan Repovš, P. V. Semenov, 1998-09-30 Consists of three relatively independent parts theory results and applications The first part is directed toward advanced math students who wish to get familiar with the foundations of the theory The second part surveys the existing results on continuous selections of multivalued mappings It is intended for specialists in the area and for those who have mastered the first part The third part collects examples of applications of continuous selections that have played a key role in the corresponding areas of mathematics It is written for researchers in general and geometric topology functional and convex analysis approximation theory and fixed point theory differential inclusions and mathematical economics Annotation copyrighted by Book News Inc Portland OR

Fixed Point Theory for Decomposable Sets Andrzej Fryszkowski, 2006-02-21 Decomposable sets since T R Rockafellar in 1968 are one of basic notions in nonlinear analysis especially in the theory of multifunctions A subset K of measurable functions is called decomposable if Q for all and measurable A This book attempts to show the present stage of decomposable analysis from the point of view of fixed point theory The book is split into three parts beginning with the background of functional analysis proceeding to the theory of multifunctions and lastly the decomposability property Mathematicians and students working in functional convex and nonlinear analysis differential inclusions and optimal control should find this book of interest A good background in fixed point theory is assumed as is a background in topology
