**Manuale tecnico- La turbina a vapore** Gabriele Uberti, 2014-08-05 Il Manuale Tecnico affronta in modo descrittivo il funzionamento delle turbine a vapore cenni storici e di nuova generazione introducendo e non esaustivo i sistemi ORC Cicli Rankine a fluido Organico per il recupero di potenza Esempio Perizia estimativa turbina a vapore *20th Century Physics* Edoardo Amaldi, Giovanni Battimelli, Giovanni Paoloni, 1998 In this important volume major events and personalities of 20th century physics are portrayed through recollections and historiographical works of one of the most prominent figures of European science A former student of Enrico Fermi and a leading personality of physical research and science policy in postwar Italy Edoardo Amaldi devoted part of his career to documenting both as witness and as historian some significant moments of 20th century science The focus of the book is on the European scene ranging from nuclear research in Rome in the 1930s to particle physics at CERN and includes biographies of physicists such as Ettore Majorana Bruno Touschek and Fritz Houtermans Edoardo Amaldi Carpaneto 1908 Roma 1989 was one of the leading figures in twentieth century Italian science He was conferred his degree in physics at Rome University in 1929 and played an active role as a member of the team of young physicists known as the boys of via Panisperna in the fundamental research on artificial induced radioactivity and the properties of neutrons which won the group s leader Enrico Fermi the Nobel Prize for physics in 1938 Following Fermi s departure for the United States in 1938 and the disruption of the original group Amaldi took upon himself the task of reorganising the research in physics in the difficult situation of post war Italy His own research went from nuclear physics to cosmic ray physics elementary particles and in later years gravitational waves Active research was for him always coupled to a direct involvement as a statesman of science and an organiser he was the leading figure in the establishment of INFN National Institute for Nuclear Physics and has played a major role as spokesman of the Italian scientific community in the creation of CERN the large European laboratory for high energy physics He also actively supported the formation of a similar trans national joint venture in space science which gave birth to the European Space Agency In these and several other scientific organisations he was often entrusted with directive responsibilities In his later years he developed a keen interest in the history of his discipline This gave rise to a rich production of historiographic material of which a significant sample is collected in this volume **Corso di meccanica, macchine ed energia per Meccanica ed energia** Cipriano Pidotella, 2017 **Catalogo dei libri in commercio** ,2003 *Lezioni di calcolo tensoriale* Umberto Cisotti, 1928

**International Symposium on History of Machines and Mechanisms Proceedings HMM 2000** Marco Ceccarelli, 2013-11-11 The International Symposium on History of Machines and Mechanisms is a new initiative to promote explicitly researches and publications in the field of the History of TMM Theory of Machines and Mechanisms It was held at the University of Cassino Italy from 11 to 13 May 2000 The Symposium was devoted mainly to the technical aspects of historical developments and therefore it has been addressed mainly to the IFToMM Community In fact most the authors of

the contributed papers are experts in TMM and related topics This has been indeed a challenge convincing technical experts to go further in depth into the background of their topics of expertise We have received a very positive response as can be seen by the fact that these Proceedings contain contributions by authors from all around the world We received about 50 papers and after review about 40 papers were accepted for both presentation and publishing in the Proceedings This means also that the History of TMM is of interest everywhere and indeed an in depth knowledge of the past can be of great help in working on the present and in shaping the future with new ideas I believe that a reader will take advantage of the papers in these Proceedings with further satisfaction and motivation for her or his work historical or not These papers cover the wide field of the History of Mechanical Engineering and particularly the History of TMM

**L'Espresso** ,1992    Lo spirito di Arcetri Roberto Casalbuoni,Daniele Dominici,Massimo Mazzoni,2021-10-13 Il volume

ripercorre gli anni salienti dell'attività dell'Istituto di Fisica di Arcetri in occasione del centenario dell'inaugurazione. Il periodo prescelto che permette di ricostruire la nascita di alcuni gruppi di ricerca presenti tuttora nel Dipartimento va dall'arrivo di Garbasso nel 1913 alla fine degli anni Sessanta. Il testo contiene una prima parte sulla storia dell'Istituto di Fisica negli anni appena citati, cui segue una seconda parte in cui vengono delineate le schede biografiche di alcuni dei protagonisti. Nell'ultima parte viene riportato un indice dei titolari dei corsi di Fisica e di Astronomia a Firenze dal 1876 al 1969, risultato del lavoro di ricerca condotto presso l'Archivio Storico dell'Università di Firenze.
