Educational Applications Kean Wah Lee, Lung Hsiang Wong, 2025-04-17 This book constitutes the refereed proceedings of the First International Conference on Intelligent Technology for Educational Applications ITEA 2024 held in Kuala Lumpur Malaysia during July 20-22, 2024. The 10 full papers and 4 short papers included in this book were carefully reviewed and selected from 34 submissions. These papers focus on pioneering research, innovative applications, and insightful perspectives from various research areas of intelligent educational technologies.

Artificial Intelligence Literacy in Higher Education Imre Fekete, 2025-07-08 This book explores the concept of artificial intelligence (AI) literacy within higher education, addressing both instructors and students' preparedness to engage with AI technologies responsibly and effectively. By synthesising existing frameworks and empirical studies alongside presenting two original research studies, the book bridges theoretical foundations with practical applications tailored for modern educational contexts. Practical recommendations include methods to develop AI literacy skills, focusing on ethical awareness, technological competence, and the potential for AI to enhance teaching and learning processes. Aimed at higher education instructors, stakeholders, and students, the book offers actionable insights and tools for fostering informed and critical engagement with AI, aligned with lifelong learning goals and professional development needs.

Preparing Students for the Future Educational Paradigm Al Husseiny, Fatima, Munna, Afzal Sayed, 2024-02-12 New technology, globalized markets, and changing employment needs contribute to the fast transformation of the educational landscape, which presents new opportunities and challenges for students. How can educators strategically adapt and enhance learning ecosystems to effectively prepare students for the challenges and opportunities of the rapidly evolving educational landscape and the future workforce? *Preparing Students for the Future Educational Paradigm* delves into the intricate web of learning ecosystems, exploring their pivotal role in shaping the education of tomorrow. The contemporary educational landscape demands a paradigm shift, and this book addresses the key challenges and opportunities inherent in learning ecosystems. It dissects these interconnected networks of individuals, groups, and resources designed to foster learning, laying bare the essential elements defining efficiency, equity, and inclusivity. This book identifies the pressing issues facing learning ecosystems and provides innovative ideas and practical strategies for rejuvenating these ecosystems. Educators will find in-depth insights into the application of learning ecosystems to enhance student learning, coupled with tangible suggestions for improvement. Policymakers will discover how to champion learning ecosystems through practical political actions and legislation. Beyond these professionals, the book captures the attention of parents, community members, businesses, and scholars, making it an indispensable read for anyone invested in the future of education.

Navigating AI and the Metaverse in Scientific Research Al Aqad, Mohammed H., Sorayyaei Azar, Ali, Albattat, Ahmad, Singh, Amrik, 2025-04-24 The rapid advancements in artificial intelligence (AI) and the emergence of the metaverse have transformed various fields of research, offering unprecedented opportunities for innovation, collaboration, and exploration. These technologies have enabled researchers to simulate complex phenomena, analyze large

datasets with precision and create immersive environments for experimental studies As AI algorithms continue to evolve and the metaverse becomes more accessible the scientific community is poised to leverage these tools to push the boundaries of traditional research methodologies However this paradigm shift also introduces new challenges including ethical concerns data security and the need for interdisciplinary expertise Navigating AI and the Metaverse in Scientific Research raises questions about data privacy algorithmic bias and the ethical implications of automated decision making It explores how AI and the metaverse can be leveraged for research and development in various sectors and assesses the implications of these technologies on research ethics education and public policy Covering topics such as academic standards personalized learning experiences and research integrity this book is an excellent resource for industry practitioners policymakers educators professionals researchers scholars academicians and more
