Aspect And Modality 1 The Progressive And The Imperfective:

Cognitive Approaches to Tense, Aspect, and Epistemic Modality Adeline Patard, Frank Brisard, 2011 This volume addresses problems of semantics regarding the analysis of tense and aspect TA markers in a variety of languages including Arabic Croatian English French German Russian Thai and Turkish Its main interest goes out to epistemic uses of such markers whereby epistemic modality is understood as indicating a degree of compatibility between the modal world and the factual world Declerck All contributions moreover tackle these problems from a more or less cognitive point of view with some of them insisting on the need to provide a unifying explanation for all usage types temporal and non temporal and all of them accepting the premise that the semantics of TA categories essentially refers to subjective rather than objective concerns The volume also represents one of the first attempts to gather accounts of TA marking in various languages that are explicitly set within the framework of Cognitive Grammar Ultimately this volume aims to contribute to establishing an awareness that modal meaning elements are directly relevant to the analysis of the grammar of time *Aspects of Tenses, Modality, and Evidentiality*, 2021-11-01 If there is a domain in linguistics which complexity calls for ever further research it is clearly that of tense aspect modality and evidentiality often referred to as TAME The reason for which these domains of investigation have been connected so tightly as to deserve a common label is that their actual intertwining is so dense that one can hardly measure their effects purely individually without regard to the other notions of the spectrum On the other hand despite their imbrications tense aspect modality and evidentiality remain needless to say separate theoretical entities The papers gathered in this volume cover a range of issues and a variety of methods that help delineate each in its way new perspectives on this broad domain *The Pragmatics of Perception and Cognition in MT Jeremiah 1:1-6:30* Elizabeth Hayes, 2008-12-10 Recent advances in cognitive linguistics provide new avenues for reading and interpreting Biblical Hebrew prophetic text This volume utilises a multi layered cognitive linguistics approach to explore Jeremiah 1:1-6:30 incorporating insights from cognitive grammar cognitive science and conceptual blending theory While the modern reader is separated from the originators of these texts by time space and culture this analysis rests on the theory that both the originators and the modern reader share common features of embodied experience This opens the way for utilising cognitive models conceptual metaphor and mental spaces theory when reading and interpreting ancient texts This volume provides an introduction to cognitive theory and method Initially short examples from Jeremiah 1:1-6:30 are used to introduce the theory and method This is followed by a detailed comparison of traditional and cognitive approaches to Biblical Hebrew grammar These insights are then applied to further examples taken from Jeremiah 1:1-6:30 in order to test and refine the approach These findings show that Jeremiah 1:1-6:30 establishes perspective for the text as a whole and that subsequent shifts in perspective may be tracked using aspects of mental spaces theory Much of the textual content yields to concepts derived from conceptual metaphor studies and from conceptual blending theory which are introduced and explained using examples

taken from Jeremiah 1 1 6 30 The entire analysis demonstrates some of the strengths and weaknesses of using recent cognitive theories and methods for analysing and interpreting ancient texts While such theories and methods do not obviate the need for traditional interpretive methods they do provide a more nuanced understanding of the ancient text The Anthropology of Time Alfred Gell,2021-03-10 Time relentless ever present but intangible and the single element over which human beings have no absolute control has long proved a puzzle The author examines the phenomenon of time and asks such fascinating questions as how time impinges on people to what extent our awareness of time is culturally conditioned how societies deal with temporal problems and whether time can be considered a resource to be economized More specifically he provides a consistent and detailed analysis of theories put forward by a number of thinkers such as Durkheim Evans Pritchard L vi Strauss Geertz Piaget Husserl and Bourdieu His discussion encompasses four main approaches in time research namely developmental psychology symbolic anthropology covering the bulk of post Durkheimian social anthropology economic theories of time in social geography and finally phenomenological theories The author concludes by presenting his own model of social cognitive time in the light of these critical discussions of the literature **The Grammar of the English Tense System** ,2008-08-22 The Grammar of the English Tense System forms the first volume of a four volume set The Grammar of the English Verb Phrase The other volumes to appear over the next few years will deal with mood and modality aspect and voice The book aims to provide a grammar of tense which can be used both as an advanced reference grammar for example by MA level or postgraduate students of English or linguistics and as a scientific study which can act as a basis for and stimulus to further research It provides not only a wealth of data but also a unique framework for the study of the English tense system which achieves great predictive and explanatory power on the basis of a limited number of relatively simple rules The framework provided allows for an analysis of the semantics of individual tenses which reflects the role of tenses not only in locating situations in time relative to speech time but also in relating situations in time relative to one another to form temporally coherent discourse Attention is paid to the relations between tenses On the one hand we can identify sets of tenses linked to particular temporal areas such as the past or the future These sets of tenses provide for the expression of a system of temporal relations in a stretch of discourse in which all the situations are located within the same temporal area On the other hand there are many contexts in which speakers might in theory choose between two or more tenses to locate a situation e g when we choose between the past tense and the present perfect to locate a situation before speech time and the book examines the difference that a choice of one or the other tense may make within a discourse context The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets and finally to a detailed examination of tenses in and tenses interacting with temporal adverbials Original data is used frequently throughout the book to illustrate the theory discussed *Aspect and Temporal Ordering* Ronny Boogaart,1999 **Proceedings of the VIIth GSCP International**

Conference.
