practice **Universal Human Values & Professional Ethics** Karthik Raj Dasari, 2025-09-19 This book presents a comprehensive framework for the Universal Human Values UHV course introduced by AICTE and approved by UGC as part of India's national initiative to integrate value based education into higher learning. It is designed to guide students, educators, and institutions in cultivating ethical awareness, emotional intelligence, and holistic development. Structured across five thematic units covering self-exploration, harmony in the human being, relationships in family and society, coexistence with nature, and professional ethics, the book blends philosophical insights with experiential learning. Each unit offers lecture content, reflective exercises, tutorials, and case studies that encourage introspection and practical application. The pedagogical approach emphasizes participatory methods, fostering clarity, compassion, and responsible living. Ultimately, the book serves as a transformative resource to nurture individuals who live with integrity, contribute meaningfully to society, and uphold universal values in both personal and professional spheres.

Proceedings of the Fourth World Conference on Engineering Education E. R. Krueger, F. A. Kulacki, 1995 *Public Service, Ethics, and Constitutional Practice* John Anthony Rohr, 1998

For civil servants who take an oath to uphold the Constitution, that document is the supreme symbol of political morality. Constitutional issues are addressed by civil servants every day whenever a policeman arrests a suspect or members of different branches of government meet. But how well do these individuals really understand the Constitution's application in their jobs? This book encourages civil servants to reflect on specific constitutional principles and events and learn to apply them to the decisions they make. Twenty seminal articles by a preeminent scholar seek to legitimate public service by grounding its ethics in constitutional practice. John Rohr stresses that ethical practice demands an immersion in the specifics of our constitutional tradition, and he offers a guide to attaining a greater sense of those constitutional principles that can be translated into action. Along the way, he considers such timely issues as financial disclosure, the treatment of civil servants as second-class citizens, and instances of civil servants caught between executive and legislative forces. Rohr's opening essays demonstrate that responsible use of administrative discretion is the key issue for career civil servants. Subsequent sections examine approaches to training civil servants using constitutional principles, character formation resulting from study of the constitutional tradition, and the ethical choices that are sometimes posed by separation of powers. A final group of chapters shows how a study of other countries' constitutional traditions can deepen an understanding of our own, while a closing essay looks at past issues and future prospects in administrative ethics from the perspective of Rohr's long involvement in the field. Throughout this insightful collection, Rohr seeks to remind public servants of the nobility of their calling, reinforce their role in articulating public interests against the excesses of private concerns, and encourage managers to make greater use of constitutional language to describe their everyday activities. Although his work focuses on the federal career civil servant, it also offers valuable lessons applicable to state and local civil servants, elected officials, judges, military personnel, and those employed in the nonprofit sector.

This volume is based on the idea that law is intertwined with the liberal arts and also that the discipline of law is itself part of the humanities and one of the social sciences. The book therefore looks at psychology as one of a range of interdisciplinary approaches to the law.

Student Perceptions of the Value of Medical Ethics Education Georgiana L. Herzberg, 1998
Hospital Ethics, 1989 **Biological Origin Human Value** George Edgin Pugh, 1977-06-20

Human values are innate, a product of man's evolution and genetics. This is the unorthodox thesis of this major work, which for the first time places the study of values on a firm scientific foundation. Drawing on biological findings which indicate that the fundamental behavioral motivations of each species are inherited, the author looks at the human brain as a biological decision system in which innate values in the form of human motivations serve as the decision criteria.
