Neuroscience in Africa Nilesh B. Patel, Vivienne A. Russell, Nouria Lakhdar-Ghazal, 2019-06-28 This Research Topic covers some of the latest research on brain and behavior in health and disease in Africa. With its untapped resources and unique situations, Neuroscience in Africa has the potential to contribute to a better understanding of human brain function both in health and disease. The diverse African fauna display a range of specializations in brain structure-function relationships as a result of adaptations to the environment. Exploration of these may lead to insights into coping strategies which could be extrapolated to humans. Africa's unique flora is being investigated for anti-inflammatory, antinociceptive, antioxidant, antiepileptogenic, and neuroprotective properties to determine its potential for use in the treatment of human brain disorders. There is also research on neurodegenerative and infectious diseases not only common to the global world but also neglected tropical diseases and conditions which provide unique avenues of investigations in basic and translational neuroscience on highly debilitating disorders and on the effects of pathogens and environmental toxins.

Outstanding Advances in Veterinary Diagnostic Ultrasonography: Novel Milestones in Disease Detection, Prediction, and Treatment

Hussein M. El-Husseiny, Ryou Tanaka, 2025-10-16 The field of veterinary diagnostic ultrasonography has seen significant advancements in recent years, becoming an essential tool in the diagnosis and treatment of a wide range of animals. This technology has proven superior to conventional radiography in visualizing internal organs and diagnosing various conditions. Furthermore, it has been instrumental in tracking organ structure and function in both health and disease states, as well as assessing the progress of post-surgical healing. Despite these advancements, there is still a need for further investigation into the potential of ultrasonography, particularly in the realm of early disease detection and prediction. The primary aim of this research topic is to shed light on the current progress and potential applications of diagnostic ultrasonography in veterinary practice. This includes exploring its use in the diagnosis and monitoring of various conditions in large, small, laboratory, wild, and domestic animals. The research will also delve into the use of novel technologies in ultrasonography, with a particular focus on their role in the early detection and prediction of cardiac diseases. This could potentially aid in the development and evaluation of timely therapeutic protocols, thereby reducing mortality rates.

Baba, Shuichi Shoji, Albert van den Berg, 2013-11-11 The Sixth International Conference on Miniaturized Chemical and Biochemical Analysis Systems known as JTAS2002 will be fully dedicated to the latest scientific and technological developments in the field of miniaturized devices and systems for realizing not only chemical and biochemical analysis but also synthesis. The first JTAS meeting was held in Enschede in 1994 with approximately 160 participants bringing together the scientists with background in analytical and biochemistry with those with Micro Electro Mechanical Systems (MEMS) in one workshop. We are grateful to Piet Bergveld and Albert van den Berg of MESA Research Institute of the University of Twente for their great efforts to arrange this exciting first meeting. The policy of the meeting was succeeded by late Prof Dr Michael Widmer in the second meeting JTAS 96 held in Basel with 275 participants. The first two meetings were held as informal workshops. From the third workshop JTAS 98 420 participants held in Banff the workshop had become a worldwide conference. Participants continued to increase in JTAS2000 about 500 participants held in Enschede and JTAS2001 about 700 participants held in Monterey. The number of submitted papers also dramatically increased in this period from 130 in 1998 230 in 2000 to nearly 400 in 2001. From 2001 JTAS became an annual symposium. The steering committee meeting held in Monterey confirmed the policy of former JTAS that quality rather than quantity would be the key point and that the parallel session format throughout the 3 *2004 IEEE Nuclear Science Symposium Conference Record*, 2004 **Medicinal Plants of Sabah, North Borneo** Christophe Wiart, 2024-06-28 Researchers in the field of natural product chemistry and pharmacology focus on discovering new drugs from medicinal plants. The medicinal plants of Sabah North Borneo many of which are found in all of Asia and the Pacific represent a vast array of resources that could be used for the discovery of drugs and the development of cosmetics as well as functional food. No other book focuses on the medicinal plants from this part of the globe in such depth. The author is well known in natural products and this text will appeal to a global audience in presenting the botanical description, chemical constituents, pharmacology, pharmaceutical, cosmetic and functional food potentials of these plants. Features: Describes in a phylogenetic order the habitats, distributions, botanical descriptions, local names, uses, chemical constituents, pharmacological activities and toxic effects of more than 250 species of medicinal plants of Sabah. Provides a selection of botanical plates of medicinal plants endemic to Sabah, hand drawn by the author. Provides comment sections to invite further research on the topic of the development of drugs, dietary products and cosmetics from Sabah medicinal plants. *Insights in Gastrointestinal Cancers: 2021* Liang Qiao, Michael Jon Pishvaian, 2023-03-01 **The American Desk Encyclopedia** Steve Luck, 1998-10-22 Here is one of the most up to date, affordable and convenient encyclopedias on the market offering more than 15,000 alphabetically arranged entries placing a world of information within arm's reach.
