This robot—and all the visuals in this infographic, including icons—were generated using AI software like MidJourney and DALL-E. The text captions were also generated using AI (ChatGPT).

This design was created and illustrated using the following text prompt: a robot head, metallic, no background, without a body, 3d render, digital, realistic, detailed, vibrant colors, AI

Generative AI is a type of artificial intelligence (AI) that uses machine learning algorithms to create new and original content like images, videos, text, and audio.

1 Forming a Database

A neural network, consisting of various information or media files like images, text, data, sounds, etc., forms the basis of artificial intelligence.

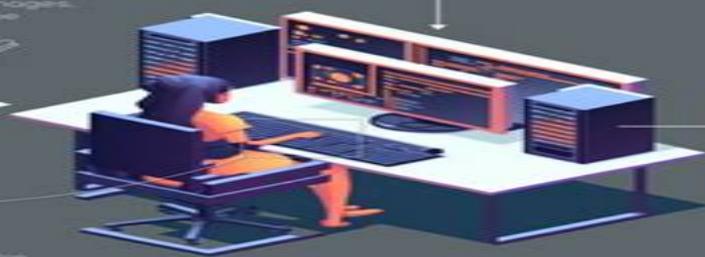

2 Inputting a Prompt

The user provides the AI with a description or sample of the desired content.

Prompts can be any user-submitted material, like words, numbers, or photos.

3 Generating Content

And the AI uses its neural network to generate new examples that are similar to the ones it has trained from.
