Medieval Civilization 400 1500 Jacques Le Goff:

Medieval Civilization 400 - 1500 Jacques Le Goff, 1991-08-26 This one thousand year history of the civilization of western Europe has already been recognized in France as a scholarly contribution of the highest order and as a popular classic Jacques Le Goff has written a book which will not only be read by generations of students and historians but which will delight and inform all those interested in the history of medieval Europe Part one Historical Evolution is a narrative account of the entire period from the barbarian settlement of Roman Europe in the fifth sixth and seventh centuries to the war torn crises of Christian Europe in the fourteenth and fifteenth centuries Part two Medieval Civilization is analytical concerned with the origins of early medieval ideas of culture and religion the constraints of time and space in a pre industrial world and the reconstruction of the lives and sensibilities of the people during this long period Medieval Civilization combines the narrative and descriptive power characteristic of Anglo Saxon scholarship with the sensitivity and insight of the French historical tradition , *The Birth of Territory* Stuart Elden, 2013-09-09 Political theory professor Stuart Elden explores the history of land ownership and control from the ancient to the modern world in *The Birth of Territory* Territory is one of the central political concepts of the modern world and indeed functions as the primary way the world is divided and controlled politically Yet territory has not received the critical attention afforded to other crucial concepts such as sovereignty rights and justice While territory continues to matter politically and territorial disputes and arrangements are studied in detail the concept of territory itself is often neglected today Where did the idea of exclusive ownership of a portion of the earth s surface come from and what kinds of complexities are hidden behind that seemingly straightforward definition *The Birth of Territory* provides a detailed account of the emergence of territory within Western political thought Looking at ancient medieval Renaissance and early modern thought Stuart Elden examines the evolution of the concept of territory from ancient Greece to the seventeenth century to determine how we arrived at our contemporary understanding Elden addresses a range of historical political and literary texts and practices as well as a number of key players historians poets philosophers theologians and secular political theorists and in doing so sheds new light on the way the world came to be ordered and how the earth s surface is divided controlled and administered *The Birth of Territory* is an outstanding scholarly achievement a book that already promises to become a classic in geography together with very few others published in the past decades Political Geography An impressive feat of erudition American Historical Review **The Enchantments of Mammon** Eugene McCarragher, 2019-11-12 Eugene McCarragher challenges the conventional view of capitalism as a force for disenchantment From Puritan and evangelical valorizations of profit to the heavenly Fordist city the mystically animated corporation and the deification of the market capitalism has hijacked our intrinsic longing for divinity laying hold to our souls **Imagination and Fantasy in the Middle Ages and Early Modern Time** Albrecht Classen, 2020-08-24 The notions of other peoples cultures and natural conditions have always been determined by the epistemology of imagination and fantasy

providing much freedom and creativity and yet have also created much fear anxiety and horror In this regard the pre modern world demonstrates striking parallels with our own insofar as the projections of alterity might be different by degrees but they are fundamentally the same by content Dreams illusions projections concepts hopes utopias dystopias desires and emotional attachments are as specific and impactful as the physical environment This volume thus sheds important light on the various lenses used by people in the Middle Ages and the early modern age as to how they came to terms with their perceptions images and notions Previous scholarship focused heavily on the history of mentality and history of emotions whereas here the history of pre modern imagination and fantasy assumes center position Imaginary things are taken seriously because medieval and early modern writers and artists clearly reveal their great significance in their works and their daily lives This approach facilitates a new deep structure analysis of pre modern culture

The Sons of St Augustine Krisztina Ilko,2025-12-11 The Order of the Hermits of St Augustine has long been sidelined as a pale imitator of the Franciscans This book provides a fundamental cross disciplinary re evaluation of the lives ideas and impact of the Augustinian friars By challenging the scholarly focus on the urban sphere in communal Italy it explores the rapid emergence of Augustinian convents as lively religious and artistic centres on the margins of cities and in the Italian countryside Moreover it demonstrates for the first time the existence of common intellectual themes which linked together dispersed Augustinian communities Fired by contemporary debates about the antiquity of the Order the Augustinian friars forged a fictive past in which they linked their origins to St Augustine and late antique hermits The book argues that saints objects and the natural environment all played a vital part in brokering the Augustinian ethos This is underpinned by tracing the things the Hermits commissioned inherited and accumulated to become the heirs of St Augustine Their forged antiquity was promoted not only through human agencies such as the creation of eremitical saints cults but also through the strategic use of the liminal position of their convents reinventing the Augustinian hermitages as places of power on the margins of the human sphere and the untamed natural environment At stake here is the extent of religious patronage in the rural landscape and the re evaluation of the long standing tension between city and countryside in the medieval imaginary Ultimately this book not only challenges the prevailing understanding of the mendicant movement as a quintessentially urban phenomenon but also sheds new light on broader processes of medieval societies in forging narratives of power prestige and antiquity through materiality and the natural environment

From Hierarchy to Anarchy J. Larkins,2009-11-23 This book considers the rise of territoriality in international relations Larkins takes the reader on a tour that moves from the mental horizons of Medieval European thought to the Renaissance The end product is a theoretical and historical account of a momentous transformation that ultimately gives rise to the territorial state

Before Orientalism Kim M. Phillips,2014 Drawing on medieval accounts of the earliest European journeys to China India Mongolia and southeast Asia Before Orientalism explores European attitudes toward Asian eating habits sexual practices femininities and civility reconstructing a precolonial vision of

the East that was often neutral or admiring India in the Eyes of Europeans Martin Fárek,2021-12-01 This book is centered around the claim that although the research in Oriental and religious studies seemingly presents unbiased objective interpretations of Indian traditions it really puts forward distorted images which primarily reflect the researchers own European culture A thorough examination demonstrates to what extent Oriental studies as well as other humanities are still influenced by theological preconceptions English edition A Time for Peace Judith T. Wozniak,1996 *Constructing Historical Realism* Martin Hall,1999 In this study the author seeks to develop Historical Realism as a new approach to International Relations Drawing on recent theoretical developments in International Relations and Historical Sociology it is argued first that a distinction between constitutive and causal theory is necessary and second that this distinction makes comparisons at a high level of abstraction across time and space possible The explanatory focus of Historical Realism is the political reproduction of states States are seen as constantly facing a double security dilemma it is being threatened or potentially threatened by two sets of rivals for revenue At the level of abstraction of Historical Realism states have two possible responses short of collapse to this double security dilemma They can either pursue a fortifying mode of political reproduction whereby the essence of their strategy is to prevent rivals from gaining strength Alternatively they can pursue an alliance building mode of political reproduction whereby they cooperate with or co opt rivals turning them into allies instead Which response states choose depend on the constitutive context they exist in and how this is changing The constitutive context is conceptualised with four dichotomous dimensions International systems it is argued can either be functionally differentiated or not and political relations in these systems can either be embedded in economic relations or not The societies from which states extract revenue can further either be competitive or not and either logistically closed or open The second part of the study develops this conceptual framework in the contexts of Japanese political reproduction towards the end of the nineteenth century the political reproduction and failure of the Roman Republic and political reproduction in early medieval western Europe **Strange Landscape** Christopher Frayling,1995 The Middle Ages represented a flowering of spirituality and culture which in Europe has not been equalled since This book examines some of the great writers and thinkers of the period and the events in which they took part *Print* Martha T. Mooney,1995 Excerpts from and citations to reviews of more than 8 000 books each year from 109 publications Electronic version with expanded coverage and retrospective version available see p 5 and p 31 Pricing Service Basis Books *Approaches to Teaching Chaucer's Troilus and Criseyde and the Shorter Poems* Tison Pugh,Angela Jane Weisl,2007 This Approaches to Teaching volume aims to provide students with a vision of Chaucer that highlights the great variety breadth and depth of his entire body of work Although Chaucerians recognize that Troilus and Criseyde and the shorter poems are as entertaining and complex as the more familiar Canterbury Tales teachers of medieval English do not readily include these texts in their courses The materials collected here offer instructors ideas and strategies for making Chaucer s lesser taught works as memorable and engrossing

for students as any of the narrative gems in *Canterbury Tales Part 1 Materials* discusses available teaching resources focusing not only on the many editions of Chaucer's works in Middle English but also on translations for teachers whose students turn to modern English as a study aid. The essays in part 2 *Approaches* begin by exploring the poetry's backgrounds including sources and genre, the growth of the English vernacular as a literary language, Chaucer's conception of history in its Christian, classical, and English political senses, the role of manuscript study in illuminating the historical record, and Chaucer's representation of gender. The section on teaching the poems features essays that offer suggestions for overcoming students' difficulties with Middle English, consider the relation between Chaucer and his readers, assess various theoretical models, and show how a wide range of visual imagery can be used in the classroom. A final section on course contexts includes essays on teaching these poems for the first time as well as designing classes for nonmajors and graduate students. The volume concludes with an appendix on reading Chaucer aloud with students.

Elements of Traditional Referentiality in the Chanson de Toile Katie Lyn Peebles, 2000 *The Anthropology of Wisdom Literature* Wanda Ostrowska Kaufmann, 1996-09-13 This unusual book examines definitions of the fable, apologue, parable, moral tale, etc. It then proposes the use of the term *exemplum*, used by medieval scribes to define all types of wisdom narratives. It makes a cross-cultural structural analysis of the *exemplum* and identifies its tripartite structure composed of the *promythium*, the nucleus, and the *epimythium*. The book ends with an analysis of the reasons why grown men spent so much time writing and collecting these tales. It demonstrates that fables and related genres were not really meant for little children to learn moral lessons. They were used to teach complex religious and political ideologies, to safely ridicule tyrants and despots, to release tensions, and to give good or bad advice. *Bibliographic Index*, 1989 *The Written World* Amanda Jane Hingst, 2009 *The Written World* draws on Orderic Vitalis's writings to investigate the ways in which high medieval historians understood geographical space to be a temporally meaningful framework for human affairs. *Alienated Minority* Kenneth R. Stow, 1992 Analyzing policies of Church and State in the Middle Ages, Stow argues that a firmly defined legal and constitutional position of the Jewish minority in the earlier period gave way to a legal status created expressly for Jews who in the later period were seen as inimical to the common good. It was this special status that paved the way for the royal expulsions of Jews that began at the end of the thirteenth century. Kenneth Stow has given us an authentic and multidimensional picture of medieval Jewry and its place in European history. He is Professor of Jewish History, University of Haifa. *In a Manner of Morall Playe* Liliana Sikorska, 2002 This book investigates and interprets various social ideologies in the moralities and interludes, dramatic texts of the late medieval period. Most of the selected plays have not been previously analyzed from the perspective of the linguistic and ideological content. Seen within the larger cultural context, mainly compared with other non-dramatic texts of the period, these texts represent rich sources of those social ideologies whose aim was to create principled individuals and a morally sound, well-functioning society.
