Papazoglou,Klaus Pohl,Michael Parkin,Andreas Metzger,2010-12-15 S Cube s Foundations for the Internet of Services Today s Internet is standing at a crossroads The Internet has evolved from a source of information to a critical infrastructure which underpins our lives and economies The demand for more multimedia content more interconnected devices more users a richer user experience services available any time and anywhere increases the pressure on existing networks and service platforms The Internet needs a fundamental rearrangement to be ready to meet future needs One of the areas of research for the Future Internet is the Internet of S vices a vision of the Internet where everything e g information software platforms and infrastructures is available as a service Services available on the Internet of Services can be used by anyone if they are used according to the policies de ned by the provider and they can be extended with new services by anyone Advantages of the Internet of Services include the p sibility to build upon other people s e orts and the little investment needed upfront to develop an application The risk involved in pursuing new business ideas is diminished and might lead to more innovative ideas being tried out in practice It will lead to the appearance of new companies that are able to operate in niche areas providing services to other companies that will be able to focus on their core business Microeconomics Michael

Defying Displacement Anthony Oliver-Smith, 2010-08-01 The uprooting and displacement of people has long been among the hardships associated with development and modernity Indeed the circulation of commodities currency and labor in modern society necessitates both social and spatial mobility However the displacement and resettlement of millions of people each year by large scale infrastructural projects raises serious questions about the democratic character of the development process Although designed to spur economic growth many of these projects leave local people struggling against serious impoverishment and gross violations of human rights Working from a political ecological perspective Anthony Oliver Smith offers the first book to document the fight against involuntary displacement and resettlement being waged by people and communities around the world Increasingly over the last twenty five years the voices of people at the grass roots are being heard People from many societies and cultures are taking action against development forced displacement and resettlement DFDR and articulating alternatives Taking the promise of democracy seriously they are fighting not only for their place in the world but also for their place at the negotiating table where decisions affecting their well being are made

Basic Strategy in Context Neil Thomson, Charles Baden-Fuller, 2010-06-01 Basic Strategy in Context centres on real world firms and managers by giving each chapter's cases a higher weighting in importance and explanation than is normal Given this emphasis on real world as opposed to theoretical treatment the book enables the solving of practical business problems like those below This emphasis on reality is cemented by the book's treatment of diversity as being the norm highlighted through European business cases from different countries Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry Often theory and cases are treated as different and separated topics we believe that our integrated didactic treatment is quite unique Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry Here is a sample of specific practical problems to which this book can show solutions Why are resources important and how are they leveraged Using the case of a British failure Railtrack we show the fatal consequences of neglecting existing resources and then in a completely different country and industry Carlo Gavazzi Space in Italy how resources can be utilised from outside the firm to achieve leverage Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment Japan and Carlos Ghosn But can change be planned Sometimes events or luck sabotage the best intentions as shown in the Samsung case The book differentiates itself from the competition in four ways Cases form the highlight of the book Taking European and some international cases as the starting point the objective is to link themes or topics to a description of their effect on the firm The linkage will occur at the relevant point in the case not in a separate section or in another book The author team has used several longitudinal cases spread over a 15-20 year period

The longitudinal cases are supported by some new non longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network We feel such an emphasis on cases is a novel feature The theory is explained using a range of modern didactic methods not usually found in competitive offerings Examples include colour coded and highlighted links from the theory to the case questions inside each theory section with model answers and unanswered questions to test the student s grasp of the concepts The book features a mixture of cases from short specific to academically challenging ones Too often superficial cases are placed at the end of chapters in strategy theory books They are picked to emphasize the topics of the preceding chapters The result is spoon feeding with little need or motivation to provoke individual thought or learning The cases in this book are comprehensive approximately 20 pages in length with ample quantitative and qualitative data thus forcing a modicum of effort from the student Shorter cases are also included for ease of understanding and instructor flexibility Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases
