The Cultural Contradictions of Progressive Politics Donald Lawrence Rosdil,2012 Why do some U S cities like Seattle and Boston impose social exactions and sustainability targets on private investment while others like Las Vegas and Houston offer property tax and fee remissions to business tolerate environmentally hazardous activities such as oil drilling and express skepticism even about recycling mandates The behavior of the former cities appears especially puzzling in view of globalization processes that seemingly offer many more options to mobile capital and expose cities vulnerability to private investment decisions Cultural Contradictions examines the paradoxical finding that some U S cities can impose burdensome regulations and extract social and environmental contributions from the private sector despite an apparently weak bargaining position It uses cultural change and the growth of non traditional subcultures to explain why cities adopt these progressive policies Responding to the urban policy literature s tendency to prioritize economic considerations over other kinds of causal factors the book demonstrates the joint impact of culture and economics in encouraging policy outcomes which emphasize social justice human rights and environmental sustainability in large U S cities The book makes several specific contributions to urban literature First it argues that cities in which nontraditional cultural beliefs and practices thrive and which are strongly linked to dynamic economic sectors such as information services professional scientific and technical services financial services and education and health care services are especially likely to adopt progressive policies It establishes this claim using both statistical analysis of large N city samples and a closer investigation of four case studies Second it reveals how progressive policies are a plausible response to psychological concerns associated with unconventional ways of life and the nature of postindustrial society Finally the book indicates how these new ways of life and postindustrial economic sectors grow in mutually reinforcing ways in order to make these policies acceptable to local economic elites and therefore favorable to the city s future development

Tourism, Performance, and Place Jillian M. Rickly-Boyd, Daniel C. Knudsen, Lisa C.

Braverman,2016-02-24 Drawing upon theories of landscape and performance this work weaves together existing tourism literature with new scholarship to forge a geographically informed theory of tourism Such a theory integrates the ways in which places are co produced circulated interpreted experienced and performed for and by tourists tourism boards and even as everyday spaces Bringing together theories of ritual Peircean semiotics ideology and performance the authors blend the often separate literatures of tourism sites and touristic practices Whereas most tourism texts focus on a part of the tourism equation the tourism site or the tourist experience a geographic theory of tourism brings these constituent parts together in thinking about notions of place Place processes are central to geography as well as tourism studies because tourism facilitates encounters with distinct locations As this book argues considering tourism as performative draws disparate areas of tourism theory together to better understand the ways tourism happens in and across places **Tourism and Leisure**

Mobilities Jillian Rickly, Kevin Hannam, Mary Mostafanezhad,2016-07-15 This book reframes tourism as well as leisure within mobilities studies to challenge the limitations that dichotomous understandings of home away work leisure and host guest bring A mobilities approach to tourism and leisure encourages us to think beyond the mobilities of tourists to ways in which tourism and leisure experiences bring other mobilities into sync or disorder and as a result re conceptualizes social theory The proposed anthology stretches across academic disciplines and fields of study to illustrate the advantages of multi disciplinary conversation and in so doing it challenges how we approach studies of movement based phenomena and the concept of scale Part One examines the ways in which mobility informs and is informed by leisure from everyday practices to leisure inspired mobile lifestyles Part Two investigates individuals and communities that become entrepreneurial in the face of changing tourism contexts and reflects on the performance of work through multiple mobilities Part Three turns to issues of development with attention to the cultural politics that frame development encounters in the context of tourism The varied ways that people move into and out of development projects is mediated by geopolitical discourses that can both challenge and perpetuate geographic imaginations of tourism destinations **Gandhi's Global Legacy** Veena R. Howard,2022-11-30
