marketing without the depth that often surrounds these to ensure that the basic concepts are easily identifiable and accessible. Students on MBA courses often do not have time to read a long text as they are studying many subjects; therefore, they require a good basic guide pitched at the appropriate level to be able to be absorbed quickly but still provide enough of a strategic element to stretch them. Written by a successful author team, *Management of Marketing* covers the key topics of the marketing component of an MBA course and provides a good balance of theory and application to ensure both aspects of the core concepts are covered.

Marketing Research Joseph F. Hair, Robert P. Bush, David J. Ortinau, 2006. *Marketing Research 3e* takes an application-oriented approach providing students with the tools and skills necessary to solve business problems and exploit business opportunities. This book is unique from any other in the market in three significant ways. First, it provides a greater balance between primary and secondary information and the techniques and methods that underpin these two important types of data. Second, it offers in-depth coverage of the critical research tools and skills that will be required of today and tomorrow's marketing researchers and business decision makers. Third, with its in-depth coverage of secondary research, the practice of customer-based management is highlighted as this book helps students see what real companies are doing for their marketing research. This book provides students a realistic and current view of the practice and importance of marketing research in the business world.

Marketing Higher Education Paul Sergius Koku, 2022-07-15. This book provides a comprehensive and accessible guide to marketing Higher Education institutions, discussing how universities are service providers and how education is a service, both of which need to be defined and marketed together. Unlike the current offering available on the subject, this book provides a uniquely applied approach linking the theory of marketing practice to the Higher Education sector through real-life case studies and examples. Each topic is covered in depth, including marketing segmentation, pricing, location, brand management, internationalization, and expansion. Overarchingly, the book considers how to develop and promote the university as a product and as a brand. Two case studies from real-life universities in a broad range of locations are provided at the end of each chapter alongside questions to aid understanding and application. *Holistic and practical Marketing Higher Education* is an ideal guide for academics and students studying services marketing, Higher Education management and leadership, and marketing in the public sector. It will also be an invaluable resource for professionals working in Higher Education administration looking to develop their skills and understanding of marketing and brand building.
