Modelling, Analysis and Design of Hybrid Systems S. Engell, G. Frehse, E. Schnieder, 2003-07-01
In 1995 the Deutsche Forschungsgemeinschaft DFG the largest public research funding organization in Germany decided to launch a priority program Schw punktprogramm in German called Kondisk Dynamics and Control of Systems with Mixed Continuous and Discrete Dynamics Such a priority program is usually sponsored for six years and supports about twenty scientists at a time in engineering and computer science mostly young researchers working for a doctoral degree There is a yearly competition across all disciplines of arts and sciences for the funding of such programs and the group of proposers was the happy winner of a slot in that year The program started in 1996 after an open call for proposals the successful projects were presented and re evaluated periodically and new projects could be submitted simultaneously During the course of the focused research program 25 different projects were funded in 19 participating university institutes some of the projects were collaborative efforts of two groups with different backgrounds mostly one from engineering and one from computer science There were two main motivations for establishing Kondisk The first was the fact that technical systems nowadays are composed of physical components with mostly continuous dynamics and computerized control systems where the reaction to discrete events plays a major role implemented in Programmable Logic Controllers PLCs Distributed Control Systems DCSs or real time computer systems
