AI Applications in Online Higher Education Administration Kathleen S. Ives, Marie Cini, Ray Schroeder, 2026-03-09. AI is reshaping higher education fast. This book brings together faculty, instructional designers, technologists, and academic leaders who are on the front lines of that change. Their chapters offer honest reflections, practical examples, and thoughtful perspectives on how AI is influencing course design, assessment, student support, policy, and leadership. Rather than hype or fear, the contributors offer grounded insight into what it takes to integrate AI in ways that are ethical, equitable, and truly student-centered. They explore both opportunities and risks with an eye toward long-term impact, not just short-term solutions. Whether you're charting an institutional AI strategy or simply trying to understand what's ahead, this collection is a timely guide. It doesn't treat AI as a magic fix, but as a tool that, when used wisely, can help higher education become more human, not less.

AI-Powered Pedagogy, Academic Transformation, and Faculty Empowerment Abdelaal, Reda Mohamed Said, Kayyali, Mustafa, 2026-02-11. Artificial intelligence (AI) is rapidly reshaping the landscape of education, ushering in new possibilities for teaching and learning. AI-powered pedagogy transforms how knowledge is delivered, enabling personalized learning experiences. As institutions adapt to these innovations, faculty members are no longer passive recipients of technology but active agents in integrating AI to enhance curriculum design and scholarly productivity. *AI-Powered Pedagogy, Academic Transformation, and Faculty Empowerment* explores the urgent need for higher education to adapt to the rise of AI and machine learning (ML). It examines how innovative curricula from diverse institutions have integrated AI and machine learning into their programs. Covering topics such as AI curriculum design and pedagogy, this book is an excellent resource for educational institutions, academicians, researchers, technology developers, curriculum developers, and graduate students.

Leaders as Architects of Change Sharon M. Ravitch, Raghu Krishnamoorthy, 2026-03-17. *Leaders as Architects of Change* provides new approaches, frames, and tools for leaders and their teams to design, drive, and support cultures of workplace inquiry, which create collective capacity and adaptivity and which ground and connect people in times of change. Written by scholar-practitioners alongside global business leaders, the book explores how organizations can thrive in a brittle, anxious, nonlinear, and incomprehensible (BANI) world. Drawing on evidence-based research and real-world experience, the contributors present practical frameworks for antifragility, emotional intelligence, adaptive culture, and collaborative leadership. Through chapters on AI-driven disruption, organizational resilience, dissent by design, and trust in virtual teams, the book reveals how leaders can design adaptive systems that bend without

breaking cultivate psychological safety and unlock human flourishing Rather than offering prescriptive fixes it provides tools to architect conditions for resilience innovation and belonging The book will resonate with executives academics consultants and students of leadership who seek actionable strategies to navigate volatility Readers will gain both insight and courage to reimagine organizations not as machines of control but as living systems of connection adaptability and purpose
