

Chapter 10

Features of a Corporation

- **Public Company** - stock is regularly traded on a national market; the company may have **thousands** of stockholders
 - When you buy shares in the stock exchange, that company doesn't get any of the money, how much stock you get depends on how much the company is worth. You are buying on the secondary market; you're buying someone else's shares.
- **Private Company** - "Closely held," does not sell its stock to the general public; may have only a few stockholders
 - You cannot buy shares in these companies, sometimes they're family owned so the family owns the shares
- **Advantages of a Corporation**
 - Can raise more capital than a proprietorship or partnership can
 - Continuous life and ease of transferring ownership (people invest because of the liquidity - knowing you can sell at any point in time); a corporation outlives the people who run it
 - Limited liability of stockholders; all we can lose is what we invest in that company
- **Disadvantages of a Corporation**
 - Separation of ownership and management; stockholders don't have a say in any decisions, so you can suffer the consequences with the company
 - Double taxation of distributed profits
 - Government regulation (S.E.C.)

Organizing a Corporation

- Corporate organizers (incorporators) obtain a charter from the state
 - Charter includes authorization to issue shares of stock
 - Where you do business and the state that chartered you do not have to be the same
 - Delaware - where the largest number of U.S. corporations are chartered (it is easy and very pro-business)
- Incorporators:
 - Pay fees
 - Sign the charter
 - File documents with the state
 - Agree to set of bylaws

Accounting and Debt Markets Mark Clatworthy, Juan Manuel García Lara, Edward Lee, 2021-05-13 Accounting and Debt Markets Four Pieces on the Role of Accounting Information in Debt Markets provides novel and up to date evidence on the role of accounting information in debt markets Companies and

organisations worldwide rely heavily on debt markets for short medium and long term financing and debt markets and financial intermediaries have significant effects on the real economy Accounting information has various functions in debt markets including inter alia informing pricing decisions and credit ratings determining the allocation of creditor control rights and establishing bank capital adequacy requirements The chapters in this book provide illustrative discussion analysis and evidence on the importance of accounting information in credit markets The first of the four pieces reflects on how a conservative financial reporting system helps firms obtain debt funds and with better conditions and why this is the case The second examines the effects of accounting disclosure on credit ratings of private companies and shows that accounting information is useful for credit rating agencies The two final pieces reflect on how banks should account for credit losses and on how regulators are tackling this issue The chapters in this book were originally published as a special issue of Accounting and Business Research
