# Acceptable risk

---

*Paul R. Hunter and Lorna Fewtrell*

The notion that there is some level of risk that everyone will find acceptable is a difficult idea to reconcile and yet, without such a baseline, how can it ever be possible to set guideline values and standards, given that life can never be risk-free? Since zero risk is completely unachievable, this chapter outlines some of the problems of achieving a measure of 'acceptable' risk by examining a number of standpoints from which the problem can be approached.

### 10.1 INTRODUCTION

A number of chapters within this book examine the question of what is risk and how we define it. Risk is generally taken to be the probability of injury, disease, or death under specific circumstances. However, this 'objective' measure of risk does not tell the whole story and, in determining acceptability of any particular risk, perceived risk is likely to play a large role.
