Natural Colorants for Food and Nutraceutical Uses

Francisco Delgado-Vargas, Octavio Paredes-Lopez, 2002-12-26 As our understanding of the science and functions of color in food has increased the preferred colorants forms of use and legislation regulating their uses have also changed Natural Colorants for Food and Nutraceutical Uses reflects the current tendency to use natural pigments It details their science technology and applications as well as their nutraceutical properties Starting with the basics the book creates an understanding of physical colors discusses color measurement and analyzes why natural pigments are preferred today The authors present an overview of global colorants including safety toxicity and regulatory aspects Information about inorganic and synthetic colorants is included The book then focuses on applications of natural colorants with special attention given to characteristics extraction and processing stability and the use of biotechnology and molecular biology to increase colorant production Finally the book examines the nutraceutical properties of natural colorants and compares them to other well known nutraceutical components From the basics to highly specialized concepts and applications Natural Colorants for Food and Nutraceutical Uses presents essential practical information about pigments in the food industry With its coverage of state of the art technologies and future trends in the application of color to food this book provides the most comprehensive up to date survey of the field

Ensuring Global Food Safety Aleksandra Martinovic, Sangsuk Oh, Huub Lelieveld, 2022-02-10 Ensuring Global Food Safety Exploring Global Harmonization Second Edition examines the policies and practices of food law which remain top contributors to food waste This fully revised and updated edition offers a rational and multifaceted approach to the science based issue of what is safe for consumption and how creating a globally acceptable framework of microbiological toxicological and nutritional standards can contribute to the alleviation of hunger and food insecurity in the world Currently many laws and regulations are so stringent that healthy food is destroyed based on scientifically incorrect information upon which laws and regulations are based This book illuminates these issues offering guidelines for moving toward a scientifically sound approach to food safety regulation that can also improve food security without putting consumers at risk Presents the progress and current status of regulatory harmonization for food standards Provides a science based foundation for global regulatory consensus Approaches challenges from a risk benefit approach also including safety assurance Includes global perspectives from governmental academic and industry experts

Food as Medicine Andrea K. Boggild, Micaela Cook Karlsen, 2024-10-22 Let food be thy medicine a mantra famously attributed to Hippocrates captures the central role of nutrition and dietary patterns in human health Not only is the food we consume linked to prevention of diseases of dietary deficiency such as scurvy pellagra and Kwashiorkor so too is it related to diseases of caloric abundance such as type 2 diabetes obesity and hypertension Moreover patterns of food consumption are increasingly linked to restoration of health and maintenance of disease free states following diagnoses such as cardiovascular disease stroke and cancer Finally our ever expanding knowledge of the human microbiome's role in health and disease continues to implicate patterns of food consumption to microbial diversity and function and their impact on mood cognitive status and metabolic health Never has the scientific examination of Hippocrates famous tenet been more timely and needed Food As Medicine is complementary to the field of lifestyle medicine which promotes health behavior change across six domains including nutrition exercise sleep stress or substance use exposure to prevent treat and potentially reverse lifestyle related chronic disease

Lipids for Functional Foods and Nutraceuticals F. D. Gunstone, 2003-01-15 Functional foods and nutraceuticals have become hot topics with an increasing number of books college courses and meetings devoted to this area of interest Foods can be regarded as functional if they can be satisfactorily demonstrated to contain bio active molecules that reduce the risk of disease or act positively to promote good health The active ingredients and components of functional foods and nutraceuticals often include lipids They are required in their own right and also for the important minor components such as carotenoids tocopherols and sterols which accompany the oils and fats This is the first book to address specifically the use of lipids in functional foods and nutraceuticals and it will be essential reading for those who produce the lipids and those who seek to incorporate them into appropriate food products The first chapter is an overview of the development of functional foods This is followed by chapters devoted to materials which are either lipids or are compounds that are fat soluble and co occur with oils and fats

These include carotenoids tocopherols phytosterols n 3 omega 3 oils diacylglycerols structured lipids sesame oil rice bran oil and oils and preparations containing palmitoleic acid y linolenic acid stearidonic acid or conjugated linoleic acid
