

Example of an Engineering Masters Personal Statement

My interest in science dates back to my years in secondary school, where I excelled in physics, chemistry, and maths. When I was at secondary school, I took a first-year calculus course at a local college (such an advanced-level class was not available in secondary school) and earned an A. It seemed only logical that I pursue a career in electrical engineering.

When I began my undergraduate career, I had the opportunity to be exposed to the full range of engineering courses, all of which tended to reinforce and solidify my intense interest in engineering. I've also had the opportunity to study a number of subjects in the humanities and they have been both enjoyable and enlightening, providing me with a new and different perspective on the world in which we live.

In the realm of engineering, I have developed a special interest in the field of laser technology and have even been taking a graduate course in quantum electronics. Among the 25 or so students on the course, I am the sole undergraduate. Another particular interest of mine is electromagnetics and last summer, when I was a technical assistant at a world-famous local lab, I learned about its many practical applications, especially in relation to microstrip and antenna design. Management at this lab was sufficiently impressed with my work to ask that I return when I graduate. Of course, my plans following completion of my current studies are to move directly into graduate work toward my master's in science. After I earn my Masters degree, I intend to start work on my PhD in electrical engineering. Later I would like to work in the area of research and development for private industry. It is in R & D that I believe I can make the greatest contribution, utilising my theoretical background and creativity as a scientist.

I am very aware of the excellent reputation of your university, and my conversations with several of your alumni have served to deepen my interest in attending. I know that, in addition to your excellent faculty, your computer facilities are among the best in the country. I hope you will give me the privilege of continuing my studies at your fine institution.
