**Cells, Gels and the Engines of Life** Gerald H. Pollack, 2001 An award winning book that challenges the current wisdom of how cells work in a visionary provocative and accessible way reads like a detective story This highly praised book emphasises the role of cell water and the gel like nature of the cell building on these features to explore the mechanisms of communication transport contraction division and other essential cell functions Lucidly written for the non expert the book is profound enough for biologists chemists physicists and engineers to devour *Cells, Gels and the Engines of Life* Gerald H. Pollack, 2001-01-01 NULL Prebiotic Chemistry and Life's Origin Michele Fiore, 2022-06-29 How life originated from the inanimate mixture of organic and inorganic compounds on the primordial earth remains one of the great unknowns in science This origin of life or abiogenesis continues to be examined in the context of the conditions and materials required for natural life to have begun on Earth both theoretically and experimentally This book provides a broad but in depth analysis of the latest discoveries in prebiotic chemistry from the microscopic to the macroscopic scale utilising experimental insight to provide a bottom up approach to plausibly explaining how life arose With contributions from global leaders this book is an ideal reference for postgraduate students and a single source of comprehensive information on the latest technical and theoretical advancements for researchers in a variety of fields from astrochemistry and astrophysics to organic chemistry and evolution *Wilhelm Reich, Biologist* James E. Strick, 2015-04-06 Refuting allegations of pseudoscience that have long dogged Reich's research the author argues that Reich's lab experiments in the mid 1930s represented the cutting edge of light microscopy and time lapse micro cinematography and deserve to be taken seriously as legitimate scientific contributions Publisher's description The Slow Death of the Aids/Cancer Paradigm Nancy Turner Banks, MD, 2016-10-14 AIDS and cancer are neither random nor infectious diseases Both are characterized by a proton deficit and a reversal of the chimeric energetic cooperative trend of the eukaryotic nucleus with the mitochondrial endosymbiont This pattern is not random It is consistent with the evolutionary heritage of the eukaryotic cell which developed the foundational glycolytic pathways during the eon of the earth's anaerobic reducing atmosphere It should no longer be a mystery that these primitive metabolic patterns dominate when bio stressors cause deterioration in the quantum and electromagnetic wave forms that allow coherency **The Slow Death of the AIDS Cancer Paradigm** confronts these issues full on **Rhetoric and Incommensurability** Randy Allen Harris, 2005-09-19 **Rhetoric and Incommensurability** examines the complex relationships among rhetoric philosophy and science as they converge on the question of incommensurability the notion jointly though not collaboratively introduced to science studies in 1962 by Thomas Kuhn and Paul Feyerabend The incommensurability thesis represents the most profound problem facing argumentation and dialogue in science surely but in any symbolic encounter any attempt to cooperate find common ground get along make better knowledge and build better societies This volume brings rhetoric the chief discipline that studies argumentation and dialogue to bear on that problem finding it much more
