Budget Essay

"Budget Cuts"

"We the people..." is the set up of the US Constitution's preamble that assists the decisions of the federal budget. The controversial topic centered on the federal budget is are we slicing the pie correctly. According to FY 2012 budget, the US government spent 3.6 trillion dollars which can be broken down into three main groups, big five, middle five, and the little guys. **In each of these budget clusters, the US government should make adjustments in the way it distributes its money to better fit the guidelines of the preamble using the big five, middle five and little guys.**

The "Big Five" represents eighty-two percent of the budget, but as the years go by there is a need of a nine percent drop in their budget. **Doc C: Defense, one of the big five, can take a drop to only ten percent instead of nineteen.** Over the past years, the US has started to not have a hefty need in defense. With us leaving Iraq, there isn't any other constant battle that we are currently in. The budget sends a signal to our enemies saying how much we are prepared to take on a fight, but there is a point where we go overboard. **Doc A:** The US is seen as a powerhouse to over countries, and we are the one they call on in time of war. But at some point we need to be "laid back" and worry about ourselves. **The Framers of the Constitution believed that a strong national defense was needed, because at the time we were still working on our independence and establishing ourselves as a country. We are not fighting anymore, and we have no reason to be.** We spend a massive amount of money on a program that isn't as much needed as it once was. That nine percent of money can be better spent somewhere else at this time. In a time of need, we can make the shift back to defense. As many citizens can see, we are not in a war where we need a large army. The only war we, as a country, are in is one verse ourselves. The federal government is what it spends. **Doc A:** The real question is "Are we just all muscle or is there something else to us?" The government has to show that we are just not all muscle, but intelligent as well.

Next, the "Middle Five" contribute to ten percent of the federal budget and deserve an increase in one of their categories. **Doc D: Education should use about eight point two percent from the defense budget to increase its own to ten percent. Education is mainly the only category that stratifies securing the Blessings of Liberty outlined in the preamble.** **Doc D:** With it being the only one justifying this objective, it deserves to be a little bit larger. **Also, it will lessen the burden of the state and local governments.** State and local governments spent on education in 2012 about \$875 billion. **Doc D:** Most education spending is from the state. The states don't have as much as they need to make education as easy to get into as it once was. For example, college tuition has increased steadily over the past years, which is making it harder and harder for high school graduates to get into. Education falls under "securing the Blessing of Liberty to ourselves and our Posterity" in the preamble, then state and local governments shouldn't be paying for it. **EE:** It is the US government obligation to be paying for. With this increase, more students will be able to go off to college and not have to stress about paying back student loans. Education rightly deserves to be pumped up to ten percent, so it lessens the burden of state and local government.

Finally, the "Little Guys" contribute to three percent of the budget according to the FY 2012 federal budget. **Doc E:** In this category, two subcategorizes should change, energy and NASA. First, NASA can take a large decrease of half of its budget, point five percent. **NASA has been in a decline in recent years. It isn't as important as it once was back in the day.** It does still have a purpose it serves in the world. Many technologies have come from this program, but there are more significant things the money can be used on at this time. Taking the point five percent from NASA and the remaining point
