Review by Laurie Miller, George Mason University

Calling on CALL: From Theory and Research to New Directions in Foreign Language Teaching is an easy-to-read, informative review of the current state of computer assisted language learning (CALL) in foreign/second language instruction. The book will appeal to many different audiences. Seasoned language instructors will benefit from the broad reviews of current technology use in the field, as well as the concise summaries of language teaching methodologies of the last fifty years. Instructors who currently use technology will find research results to validate this use. Moreover, instructors who have not integrated technology into instruction will find discussions of technology use that do not goad them into using technology simply for the sake of using it. Instead, they are provided with accessible explanations grounded in current language acquisition theory and practice that describe ways to implement technology use. Pre-service foreign language/second language instructors will be exposed to theory and practices through clear, honest explanations and challenged to apply what they have studied by the *Questions for Reflection* sections found at the end of each chapter. Additionally, graduate students or instructors looking for research topics will find many informed suggestions at the end of the chapters.

Because each chapter in the book shows the theoretical underpinnings of the particular aspect of CALL it discusses, the book serves as a strong reminder that technology use alone is not an effective tool for language instruction. To help instructors integrate theoretically sound technology use into their teaching, *Calling on CALL* presents thirteen chapters focused on various learning objectives, including foreign/second language reading, writing, pronunciation, and sociolinguistic competence. This organization provides readers with a clear idea as to why CALL can work, and how it can help lead foreign/second language instruction in new, pedagogically sound directions.

The introduction and first three chapters present overviews of technology use and pedagogy. Nike Arnold and Lara Ducate, the book's editors, give an up-to-date overview of current technology use both in and out of the classroom in Chapter 1, *CALL: Where Are We and Where Do We Go From Here?* Their aim is to highlight the prevalence of computer use in modern life. The authors point out that many educators
