The Theological Status Of Heliocentrism:

Judaism in the Theology of Sir Isaac Newton M. Goldish, 2013-04-17 This book is based on my doctoral dissertation from the Hebrew University of Jerusalem 1996 of the same title As a master's student working on an entirely different project I was well aware that many of Newton's theological manuscripts were located in our own Jewish National and University Library but I was under the mistaken assumption that scores of highly qualified scholars must be assiduously scouring them and publishing their results It never occurred to me to look at them at all until having finished my master's I spoke to Professor David Katz at Tel Aviv University about an idea I had for doctoral research Professor Katz informed me that the project I had suggested was one which he himself had just finished but that I might be interested in working on the famous Newton manuscripts in the context of a project being organized by him Richard Popkin James Force and the late Betty Jo Teeter Dobbs to study and publish Newton's theological material I asked him whether he was not sending me into the shark infested waters of highly competitive scholarship and learned that in fact there were only a handful of scholars in the world who actively studied and published on Newton's theology At the time the group consisted mainly of Popkin Force Dobbs Frank Manuel Kenneth Knoespel and David Castillejo

The Rise of Modern Philosophy Anthony Kenny, 2006-06-29 Sir Anthony Kenny's engaging new history of Western philosophy now advances into the modern era The Rise of Modern Philosophy is the fascinating story of the emergence from the early sixteenth to the early nineteenth century of great ideas and intellectual systems that shaped modern thought Kenny introduces us to some of the world's most original and influential thinkers and shows us the way to an understanding of their famous works The thinkers we meet include Ren Descartes traditionally seen as the founder of modern philosophy the great British philosophers Hobbes Locke and Hume and the towering figure of Immanuel Kant who perhaps more than any other made philosophy what it is today In the first three chapters Kenny tells the story chronologically his lively accessible narrative brings the philosophers to life and fills in the historical and intellectual background to their work It is ideal as the first thing to read for someone new to the history of modern philosophy In the seven chapters that follow Kenny looks closely at each of the main areas of philosophical exploration in this period knowledge and understanding the nature of the physical universe metaphysics the most fundamental questions there are about existence mind and soul the nature and content of morality political philosophy and God A selection of intriguing and beautiful illustrations offer a vivid evocation of the human and social side of philosophy Anyone who is interested in how our understanding of ourselves and our world developed will find this a book a pleasure to read

A New History of Western Philosophy Anthony Kenny, 2012-08-16 This book is no less than a guide to the whole of Western philosophy the ideas that have undergirded our civilization for two and a half thousand years Anthony Kenny tells the story of philosophy from ancient Greece through the Middle Ages and the Enlightenment into the modern world He introduces us to the great thinkers and their ideas starting with Plato Aristotle and the other founders of Western thought In

the second part of the book he takes us through a thousand years of medieval philosophy and shows us the rich intellectual legacy of Christian thinkers like Augustine Aquinas and Ockham Moving into the early modern period we explore the great works of Descartes Hobbes Locke Leibniz Spinoza Hume and Kant which remain essential reading today In the nineteenth and twentieth centuries Hegel Mill Nietzsche Freud and Wittgenstein again transformed the way we see the world Running through the book are certain themes which have been constant concerns of philosophy since its early beginnings the fundamental questions of what exists and how we can know about it the nature of humanity the mind truth and meaning the place of God in the universe how we should live and how society should be ordered Anthony Kenny traces the development of these themes through the centuries we see how the questions asked and answers offered by the great philosophers of the past remain vividly alive today Anyone interested in ideas and their history will find this a fascinating and stimulating read

Theology of Renewal Proceedings of the Congress on the Theology of the Renewal of the Church: Renewal of religious structures L. K. Shook,1968 **Science and Christianity** Tim Reddish,2016-08-15 Too often conversations on Science and Christianity skate over much deeper assumptions or perceptions on the nature and interpretation of Scripture and the nature of science and of God Instead the rhetoric goes quickly towards contentious issues like evolution global warming or genetic engineering without establishing a framework of mutual understanding Consequently conversations can take place between people who completely misunderstand each other because those foundations have not been clearly articulated In this introductory book you are invited on a journey of discovery one that makes us self aware of our starting assumptions It is only from a framework of critical engagement with both science and the Bible that contemporary issues and the needs of the church and society can be addressed While the Creator is one who brings order this book also reminds us that untamed chaos also has a God ordained place within creation The author explores the element of chance that seems to be at the heart of nature and shows how this can be incorporated constructively within Christian thinking Nature is not mere mechanism and is more open than we might first think This means that miracles are scientifically plausible and prayer can really change things **Change and Stability** Maija Kallinen,1995 **Flattening the Medieval Earth** Pablo de Felipe,2025-08-08 Flattening the Medieval Earth explores the origin of the flat earth error i e the

false accusation that ancient and medieval Christians believed in a flat Earth and what this implies in terms of a conflict between science and Christianity Engaging with scientific and religious debates this book includes a reception study of two key figures of the 4th century AD Lactantius and Augustine This study demonstrates that the mistaken dark image of medieval scholars as flat earthers started very early c 1600 as an internal Christian debate in the context of new geographical and astronomical views The author draws on extensive research including many primary and secondary sources from different countries and languages not previously put into conversation Combining history of science church history science and religion history of navigation and historiography this book gives the most updated explanation of the origin of the flat error finding paradoxes and unexpected answers along the way to understand the past and to reflect on some current approaches in science and religion The Enemy is Still Here! ,2003 **Science, Theology, and Ethics** Ted Peters,2003 Cover Half Title Page Copyright Page Dedication Table of Contents Previously Published Material Introduction Part I From Conflict to Consonance 1 Theology and Science Where Are We 2 Scientific Research and the Christian Faith Part II Physics Cosmology and Creation 3 The Terror of Time 4 God as the Future of Cosmic Creativity 5 David Bohm Postmodernism and the Divine 6 Exotheology Speculations on Extraterrestrial Life Part III Genetics Ethics and Our Evolutionary Future 7 Genetics and Genethics Are We Playing God with Our Genes 8 Cloning Shock A Theological Reaction 9 The Stem Cell Debate Ethical Questions 10 Designer Children The Market World of Reproductive Choice 11 Multiple Choice in Baby Making 12 Playing God and Germline Intervention 13 Coevolution Pain or Promise Part IV Nuclear Waste and Earth Ethics 14 Whole and Part The Tension between the Common Good and Individual Freedom 15 Not in My Backyard the Waste Disposal Crisis Part V The Human Body A Theological Prognosis 16 Wholeness in Salvation and Healing 17 The Physical Body of Immortality Name Index Theology of Renewal: Renewal of religious structures Laurence K.
