Theoretical Nuclear Physics Victor F Weisskopf:

Theoretical Nuclear Physics John M. Blatt, Victor F. Weisskopf, 2012-04-30 An uncommonly clear and cogent investigation and correlation of key aspects of theoretical nuclear physics by leading experts the nucleus nuclear forces nuclear spectroscopy two three and four body problems nuclear reactions beta decay and nuclear shell structure **Theoretical Nuclear Physics. John M. Blatt, ... Victor F. Weisskopf, ...** Victor Frederick Weisskopf, John M. Blatt, 1954 *Theoretical Nuclear Physics* J. M. Blatt, V. F. Weisskopf, 1979-04-16 The last twenty years have witnessed an enormous development of nuclear physics A large number of data have accumulated and many experimental facts are known As the experimental techniques have achieved greater and greater perfection the theoretical analysis and interpretation of these data have become correspondingly more accurate and detailed The development of nuclear physics has depended on the development of physics as a whole While there were interesting speculations about nuclear constitution as early as 1922 it was impossible to make any quantitative theory of even the simplest nucleus until the discovery of quantum mechanics on the one hand and the development of experimental methods sufficiently sensitive to detect the presence of a neutral particle the neutron on the other hand The further development of our understanding of the nucleus has depended and still depends on the development of ever more powerful experimental techniques for measuring nuclear properties and more powerful theoretical techniques for correlating these properties Practically every simple reasonable and plausible assumption made in theoretical nuclear physics has turned out to be in need of refinement and the numerous attempts to derive nuclear forces and the properties of nuclei from a more fundamental approach than the analysis of the data have proved unsuccessful so far Nuclear physics is by no means a finished edifice Theoretical Nuclear Physics John Markus Blatt, 1956 **Theoretical Nuclear Physics** Blatt, 1952 **THEORETICAL NUCLEAR PHYSICS DT.** John Markus Blatt, Victor Frederick Weisskopf, 1959
