

THE PERFECT BLOG POST

Goal = Grab Attention

Your headline gets read more than anything else on your website. That's why your headline serves one goal: grab attention so people feel compelled to read your opening.

Key Insight:

When people make snap decisions about text, they prefer fewer characters per line (CPL). The half-width image shortens the line length of the opening—fewer CPL—thus enticing people to read because it caters to their preferences.

Connect Emotionally

Your first piece of content should aim to trigger an emotion in your reader. When people get emotional, they pay attention. They're also more likely to take action after being put into an emotional state.

<http://socialtriggers.com/craft-contagious-content>

Big Promise #2

Here's where you promise people exactly what they'll learn... the step-by-step method... the how to. You already connected, now's the time to get people to take action.

Buy or Subscribe?

Here's where you close out your article with another call to action. You can include a "buy now" CTA or a "subscribe." I often use subscribe.

Key Insight:

Direct marketers have long known that if you get people to read your first 3-4 sentences, they're more likely to read your entire article. That said, the point of your opening is to get people to read your opening... and that's it.

<http://socialtriggers.com/power-of-curiousy>

Big Promise

This sub-headline has one main goal... to entice people to read your first piece of content and that's it. How? Make a promise to your readers... give them a benefit.

The Soundbite

Use a click to tweet "quote" right here. Why? Who do people quote? People quote authorities. Enticing people to quote you positions you as an authority. Plus, people like tweeting quotes and you'll get more traffic from social media as a result of it.

<http://socialtriggers.com/sound-bites-traffic>

The How To Section

Give people practical, easy to implement advice. Get people results, and they'll remember you forever. Also, practically useful content is more viral than other types of content.

Using Technology to Teach Information Literacy Thomas P. Mackey, Trudi E. Jacobson, 2008 Why teach information literacy technology literacy and discipline specific research skills separately when teaching them together fires students imaginations improves learning visibly demonstrates the value of your library s unique services and expertise to faculty and lets you reach students who

might never otherwise walk through the library's doors. The first book on teaching information literacy with technology across the curriculum is full of case studies and lesson plans that will help you put together a cutting edge technology based course for your institution. Each chapter is co-written by a librarian faculty member team involved in a collaborative teaching with technology project. An overview of the literature will help you explain the value of this dynamic approach to faculty and administration. Chapter authors represent a wide range of institutions and disciplines; they give you course goals and organization, the hows and whys of the technologies used, and pitfalls to avoid. Featured technologies include collaborative web tools, presentation software, video, and other multimedia. Podcasts, blogs, wikis, and more. Every academic library will want to have a copy of this book, as will any faculty member involved in teaching information literacy.

Making the Most of the Web in Your Classroom Timothy D. Green, Abbie Brown, LeAnne Robinson, 2008. I have not seen a more teacher friendly resource for using the Web in the classroom. The authors took both novices and experts into consideration. A must have in every school. Elizabeth Alvarez, Math and Science Coach, Chicago Public Schools, IL. A user friendly tool on many levels. I would recommend this book to media specialists, instructional technology teachers, and district coordinators for both content and technology. April DeGennaro, Gifted Education Teacher, Peoples Elementary School, Fayetteville, GA. Translate Web technology into practical applications for the daily curriculum. Designed for novices and experienced users, this comprehensive guide includes all the need-to-know aspects of using the World Wide Web to support student learning. *Making the Most of the Web in Your Classroom* covers the language of the Web, describes Web editing software, and shows how to use Web tools that offer unique learning opportunities for students. This book examines issues of student safety, appropriate netiquette, and copyright, and other legal considerations, and provides field-tested strategies, examples, and reproducibles to help teachers create powerful learning opportunities. Educators will be able to meet ISTE/NETS technology and content standards as they design and build Web sites. Help students develop their own Internet projects. Evaluate and manage Web projects. Featuring a list of key terms in each chapter, this timely resource will motivate your students and help make technology a seamless part of your classroom instruction.

The New Learning Commons where Learners Win! David V. Loertscher, Carol Koechlin, Sandi Zwaan, 2008. Examines the function and role of school libraries and computer labs. Considers how these resources are used differently than intended because they have been organization based rather than client based.
