HS care to come Edited and authored by global experts who have co authored 2019 U S and Canadian guidelines on hidradenitis suppurativa *Food, nutrition and microecological health* Xingbin Yang,Xin Liu,Guifang Tian,Hong-Bao Li,2023-04-04 **Unraveling the Links between Nutrients and Metabolic Dysfunction-Associated Liver Disease: Insights and Implications** Md Wasim Khan,Claudia Tovar-Palacio, Bruno Ramos-Molina,Ivan Torre-Villalvazo,2024-12-06 The Research Topic Unraveling the Links between Nutrients and Metabolic Dysfunction Associated Liver Disease Insights and Implications focuses on the relationship between nutrient intake and metabolic liver diseases such as metabolic dysfunction associated fatty liver disease MAFLD and MAFLD associated hepatocarcinoma The collection will include original articles and reviews exploring the role of specific nutrients such as carbohydrates proteins and fats as well as dietary bioactive compounds in developing and progressing metabolic liver disease or improving liver deterioration Additionally the collection discusses the impact of dietary patterns and interventions such as calorie restriction and supplementation on liver health The insights gained from these articles provide valuable information on preventing and treating metabolic liver disease through dietary modification and nutritional interventions **Analyzing the relationship between dietary patterns, health outcomes and individual food choices** Francesco Visioli,Francesco Sofi,2023-01-30 *Centenarians* Calogero Caruso,2019-08-05 This state of the art review on longevity focuses on centenarians studied as a model of positive biology The extraordinary rise in the elderly population in developed countries underscores the importance of studies on ageing and longevity in order to decrease the medical economic and social problems associated with the increased number of non autonomous individuals affected by invalidating pathologies Centenarians have reached the extreme limits of human life span Those in relatively good health who are able to perform their routine daily tasks are the best examples of extreme longevity representing selected individuals in which the appearance of major age related diseases including cancer and cardiovascular diseases has been consistently delayed or avoided The relationship between causality and chance is an open discussion topic in many disciplines In particular ageing the related diseases and longevity are difficult to define as a consequence of causality chance or both Discussing the relevance of these different factors in the attainment of longevity the book gathers contributions on genetic epigenetic and phenotypic aspects of centenarians The positive biology approach is applied to clarify the causes of positive phenotypes as well as to explain the biological mechanisms of health and well being with the aim of preventing and or reducing frailty and disability in the elderly *Micronutrients, Immunity and Infection* Philip Calder ,Sladjana Sobajic,2025-10-03 Many micronutrients vitamins and minerals have clearly identified roles in supporting the function of cells of the immune system People with micronutrient deficiencies often have immune impairments and are susceptible to infections and to infections being severe even fatal In such individuals micronutrient supplements can reverse immune impairments and reduce the risk of infections Nevertheless the relationships between micronutrient status immunity and infection are complex some micronutrients that are required by the immune system such as iron can also

increase the risk of certain infections probably because those micronutrients favor pathogen growth and survival Furthermore the acute phase response to infections alters micronutrient metabolism This makes understanding of the relationship between micronutrient status and infection more complicated COVID 19 increased interest in micronutrients including vitamins C and D and zinc amongst others in the context of immunity and infection but the findings of different studies have been inconsistent highlighting the complexity of this field This Research Topic welcomes manuscript submissions on micronutrients immunity and infection These may be mechanistic studies conducted in controlled settings such as in cell culture or experimental animals human epidemiological studies and trials in human participants and patients evaluating relationships between micronutrient exposure immune outcomes and infection and the underlying mechanisms
