She explains how the next generation discovery services supported in the library services platforms LSPs provide a single point of access to library content in all types and formats thereby offering a unified solution to managing library operations. The book covers methods of analyzing user requirements, describes how to structure these requirements in RFPs and details proprietary and open source integrated library systems ILSs and LSPs for school, public, special and academic libraries. Up to date information is provided about ILS software installation and testing software and hardware architecture such as single and multi tenant SaaS and PaaS and IaaS and usability assessment strategies for evaluating the ILS or LSP. The author concludes by describing what is likely coming next in the library automation arena.
