The Traveling Salesman Problem A Computational Study:

The Traveling Salesman Problem David L. Applegate, Robert E. Bixby, Vašek Chvátal, William J. Cook, 2011-09-19 This book presents the latest findings on one of the most intensely investigated subjects in computational mathematics the traveling salesman problem It sounds simple enough given a set of cities and the cost of travel between each pair of them the problem challenges you to find the cheapest route by which to visit all the cities and return home to where you began Though seemingly modest this exercise has inspired studies by mathematicians chemists and physicists Teachers use it in the classroom It has practical applications in genetics telecommunications and neuroscience The authors of this book are the same pioneers who for nearly two decades have led the investigation into the traveling salesman problem They have derived solutions to almost eighty six thousand cities yet a general solution to the problem has yet to be discovered Here they describe the method and computer code they used to solve a broad range of large scale problems and along the way they demonstrate the interplay of applied mathematics with increasingly powerful computing platforms They also give the fascinating history of the problem how it developed and why it continues to intrigue us

Novel Trends in the Traveling Salesman Problem Donald Davendra, Magdalena Bialic-Davendra, 2020-12-09 The Traveling Salesman Problem TSP is widely considered one of the most intensively studied problems in computational mathematics and operations research Since its inception it has become the poster child for computational complexity research A number of problems have been transformed to a TSP problem and its application base now extends into scheduling manufacturing routing and logistics With the advent of high performance computing and advanced meta heuristics such as GPU programming and swarm based algorithms the TSP problem is positioned firmly as the go to problem for the development of the next generation of high performance intelligent heuristics This book looks to leverage some of these new paradigms for both students and researchers in this field

The Traveling Salesman Problem Weiqi Li, 2023-07-08 This book presents a new search paradigm for solving the Traveling Salesman Problem TSP The intrinsic difficulty of the TSP is associated with the combinatorial explosion of potential solutions in the solution space The author introduces the idea of using the attractor concept in dynamical systems theory to reduce the search space for exhaustive search for the TSP Numerous examples are used to describe how to use this new search algorithm to solve the TSP and its variants including multi objective TSP dynamic TSP and probabilistic TSP This book is intended for readers in the field of optimization research and application

A Computational Study of Annealing-based Heuristics for the Traveling Salesman Problem Joshua W. Pepper, 1999

In Pursuit of the Traveling Salesman William J. Cook, 2011-12-27 The story of one of the greatest unsolved problems in mathematics What is the shortest possible route for a traveling salesman seeking to visit each city on a list exactly once and return to his city of origin It sounds simple enough yet the traveling salesman problem is one of the most intensely studied puzzles in applied mathematics and it has defied solution to this day In this book William Cook takes readers on a mathematical excursion

picking up the salesman's trail in the 1800s when Irish mathematician W R Hamilton first defined the problem and venturing to the furthest limits of today's state of the art attempts to solve it He also explores its many important applications from genome sequencing and designing computer processors to arranging music and hunting for planets In Pursuit of the Traveling Salesman travels to the very threshold of our understanding about the nature of complexity and challenges you yourself to discover the solution to this captivating mathematical problem Some images inside the book are unavailable due to digital copyright restrictions *Traveling Salesman Problem* Federico Greco,2008-09-01 The idea behind TSP was conceived by Austrian mathematician Karl Menger in mid 1930s who invited the research community to consider a problem from the everyday life from a mathematical point of view A traveling salesman has to visit exactly once each one of a list of m cities and then return to the home city He knows the cost of traveling from any city i to any other city j Thus which is the tour of least possible cost the salesman can take In this book the problem of finding algorithmic technique leading to good optimal solutions for TSP or for some other strictly related problems is considered TSP is a very attractive problem for the research community because it arises as a natural subproblem in many applications concerning the every day life Indeed each application in which an optimal ordering of a number of items has to be chosen in a way that the total cost of a solution is determined by adding up the costs arising from two successively items can be modelled as a TSP instance Thus studying TSP can never be considered as an abstract research with no real importance

On the symmetric travelling salesman problem: a computational study International Business Machines Corporation. Research Division,Manfred W. Padberg,Saman Hong,1977 Computational Mathematical Programming Klaus Schittkowski,2013-06-29 This book contains the written versions of main lectures presented at the Advanced Study Institute ASI on Computational Mathematical Programming which was held in Bad Windsheim Germany F R from July 23 to August 2 1984 under the sponsorship of NATO The ASI was organized by the Committee on Algorithms COAL of the Mathematical Programming Society Co directors were Karla Hoffmann National Bureau of Standards Washington U S A and Jan Teigen Rabobank Nederland Zeist The Netherlands Ninety participants coming from about 20 different countries attended the ASI and contributed their efforts to achieve a highly interesting and stimulating meeting Since 1947 when the first linear programming technique was developed the importance of optimization models and their mathematical solution methods has steadily increased and now plays a leading role in applied research areas The basic idea of optimization theory is to minimize or maximize a function of several variables subject to certain restrictions This general mathematical concept covers a broad class of possible practical applications arising in mechanical electrical or chemical engineering physics economics medicine biology etc There are both industrial applications e g design of mechanical structures production plans and applications in the natural engineering and social sciences e g chemical equilibrium problems chromatography problems Nature-Inspired Computation in Navigation and Routing Problems Xin-She Yang,Yu-Xin Zhao,2020-02-19 This book discusses all the major nature inspired algorithms with a

focus on their application in the context of solving navigation and routing problems It also reviews the approximation methods and recent nature inspired approaches for practical navigation and compares these methods with traditional algorithms to validate the approach for the case studies discussed Further it examines the design of alternative solutions using nature inspired techniques and explores the challenges of navigation and routing problems and nature inspired metaheuristic approaches
