Fashion and Motherhood Laura Snelgrove,2024-01-25 Motherhood whether achieved through biological or other means is not a rare experience dressing oneself even less so The two phenomena are intimately linked as both occur on and to the private body and are also fully subject to social pressures and the changing tides of public opinion They also for anyone who experiences motherhood define one another and work together to shape an individual s identity and place in their culture This rich collection explores the essential question of how motherhood and fashion interact interrogating their relationships to power misogyny temporality longing and embodiment among other themes The 13 essays examine representations on film in popular print and literature they use images narrative and material evidence from the past to

excavate the historical cleavages in how mothers have been expected to hide display share and sacrifice their bodies An international range of scholars explores the 19th to the 21st centuries tracing how fashion and motherhood have operated as powerfully interdependent experiences and continue to determine how women are judged and corralled yet also find meaning connection and strength

Compatibility Modeling Xuemeng Song, Liqiang Nie, Yinglong Wang, 2022-06-01

Nowadays fashion has become an essential aspect of people's daily life As each outfit usually comprises several complementary items such as a top bottom shoes and accessories a proper outfit largely relies on the harmonious matching of these items Nevertheless not everyone is good at outfit composition especially those who have a poor fashion aesthetic Fortunately in recent years the number of online fashion oriented communities like IQON and Chictopia as well as e-commerce sites like Amazon and eBay has grown The tremendous amount of real world data regarding people's various fashion behaviors has opened a door to automatic clothing matching Despite its significant value compatibility modeling for clothing matching that assesses the compatibility score for a given set of equal or more than two fashion items e.g a blouse and a skirt yields tough challenges a the absence of comprehensive benchmark b comprehensive compatibility modeling with the multi-modal feature variables is largely untapped c how to utilize the domain knowledge to guide the machine learning d how to enhance the interpretability of the compatibility modeling and e how to model the user factor in the personalized compatibility modeling These challenges have been largely unexplored to date In this book we shed light on several state of the art theories on compatibility modeling In particular to facilitate the research we first build three large scale benchmark datasets from different online fashion websites including IQON and Amazon We then introduce a general data driven compatibility modeling scheme based on advanced neural networks To make use of the abundant fashion domain knowledge i.e clothing matching rules we next present a novel knowledge guided compatibility modeling framework Thereafter to enhance the model interpretability we put forward a prototype wise interpretable compatibility modeling approach Following that noticing the subjective aesthetics of users we extend the general compatibility modeling to the personalized version Moreover we further study the real world problem of personalized capsule wardrobe creation aiming to generate a minimum collection of garments that is both compatible and suitable for the user Finally we conclude the book and present future research directions such as the generative compatibility modeling virtual try on with arbitrary poses and clothing generation
