Gowers,2018-02-05 This volume is the English version of the second edition of the bilingual textbook by Rasch Verdooren and Gowers 1999 A parallel version in German is available from the same publisher This book is intended for students and experimental scientists in all disciplines and presumes only elementary statistical knowledge This prerequisite knowledge is summarised briefly in appendix B Knowledge of differential and integral calculus is not necessary for the understanding of the text Matrix notation is explained in Appendix C As well as the correction of errors the present edition differs from the first by the introduction of some new sections such as that on testing the equality of two proportions Section 3 4 4 and the inclusion of sequential tests All new material is accompanied by descriptions of the relevant SPSS and CADEMO procedures

*Supervised Machine Learning* Tanya Kolosova,Samuel Berestizhevsky,2020-09-21 AI framework intended to solve a problem of bias variance tradeoff for supervised learning

methods in real life applications The AI framework comprises of bootstrapping to create multiple training and testing data sets with various characteristics design and analysis of statistical experiments to identify optimal feature subsets and optimal hyper parameters for ML methods data contamination to test for the robustness of the classifiers Key Features Using ML methods by itself doesn't ensure building classifiers that generalize well for new data Identifying optimal feature subsets and hyper parameters of ML methods can be resolved using design and analysis of statistical experiments Using a bootstrapping approach to massive sampling of training and tests datasets with various data characteristics e.g contaminated training sets allows dealing with bias Developing of SAS based table driven environment allows managing all meta data related to the proposed AI framework and creating interoperability with R libraries to accomplish variety of statistical and machine learning tasks Computer programs in R and SAS that create AI framework are available on GitHub
