They have also been the source of abundant corruption and of serious challenges to the norms and effectiveness of constitutional accountability in democratic states. On paper, the arms trade is heavily regulated; national legislation and international treaties are in place which purport to prohibit certain transactions and limit others. Yet despite its importance, legal and international relations scholarship on the subject has been surprisingly limited. This book fills this gap in the literature by examining and comparing the export control regimes of eight leading nations: USA, Russia, the UK, France, Germany, Sweden, China, and India, with chapters contributed by leading experts in the field of law and international relations.
