[AI TOOLS FOR EVERYDAY LIFE](#) Jeet Arya,2026-02-17

Artificial intelligence is no longer a technology of the future. It is a practical tool available right now, and most of the best tools are either free or cost less than a streaming subscription. The problem is not access; it is knowing what actually works, how to use it, and when to trust it. *AI Tools for Everyday Life* is the guide that answers those questions honestly. No hype. No jargon. No assumption that you have an engineering degree. Just clear, tested, practical guidance for using AI in the four areas of life where it delivers the most immediate value.

WHAT IS COVERED

- Productivity:** Use ChatGPT, Claude, Gemini, and Copilot to write faster, summarise meetings, automate repetitive tasks, and reclaim hours lost to email every week.
- Money:** Use AI budgeting tools and smart prompting to build personalised budgets, model debt payoff strategies, and get financial education your bank never offered.
- Health:** Get substantive health information from AI, use wearable-integrated fitness tools, and access clinically backed mental health support with honest guidance on where AI ends and professional care begins.
- Learning:** Turn any document or course material into an interactive personal tutor using NotebookLM, Khanmigo, and AI study techniques grounded in cognitive science.
