preparation of matcha contribute to its distinct flavor texture and health benefits To understand matcha it s crucial to comprehend its production journey Matcha begins as tencha a type of green tea grown in shade covered fields The shading process usually lasting around 3 4 weeks before harvest stimulates the production of chlorophyll and amino acids particularly L theanine This gives matcha its vivid green color and unique umami rich taste profile Upon harvesting the leaves undergo steaming to prevent fermentation and preserve their vibrant green color They re then dried and deveined leaving only the precious leaf flesh known as tencha This tencha is stone ground into a fine talc like powder resulting in matcha The preparation of matcha involves whisking the powder with hot water using a bamboo whisk chasen until a frothy smooth consistency is achieved Unlike steeped teas where leaves are infused and removed matcha incorporates the entire leaf providing a concentrated dose of nutrients antioxidants and flavor in every sip Matcha boasts a unique combination of caffeine and L theanine resulting in a calm focused energy without the jitteriness often associated with coffee This blend of compounds offers mental clarity relaxation and an extended sense of alertness
