5G System Design Wan Lei, Anthony C.K. Soong, Liu Jianghua, Wu Yong, Brian Classon, Weimin Xiao, David Mazzaresse, Zhao Yang, Tony Saboorian, 2021-08-11. This book presents a detailed pedagogical description of the 5G commercial wireless communication system design from an end-to-end perspective by those that were intimate with its development. The exposition only assumes that the reader is passingly familiar with LTE and builds upon that knowledge. By comparing and contrasting NR with LTE, it allows for quick mastering of 5G. As such, it gives concise and highly accessible descriptions of the key technologies in the 5G physical layer, radio access network layer, protocols, and procedures. How the 5G core and EPC is integrated into the radio access network, how virtualization, slicing, and edge computing will fundamentally change the way we interact with the network, as well as 5G spectrum issues. The 2nd edition of this book significantly enhances and updates the first edition by adding 5G security and Release 16 developments. Loosely speaking, 5G Release 15 can be characterized as being optimized for the cellular carrier eMBB service, while 5G Release 16 is the beginning of the optimization of 5G for the vertical industries. It is mainly focused on the support of the vehicular, vertical, and Industrial Internet of Things. As such, we have significantly altered the first edition to cover the key features standardized in Release 16, including URLLC, V2X, IIoT, enhanced MIMO, unlicensed access, positioning, power savings, and IAB. On the network side, detailed discussion covers NR security, as well as the newly standardized access traffic steering, non-3GPP access, switching, and splitting features, non-3GPP access network support, and private networks. Engineers, computer scientists, and professionals from those with a passing knowledge of 4G LTE to experts in the field will find this book to be a valuable asset. They will gain a comprehensive understanding of the end-to-end 5G commercial wireless system. Advanced level students and researchers studying and working in communication engineering who want to gain an understanding of

the 5G system as well as methodologies to evaluate features and technologies intended to supplement 5G will also find this book to be a valuable resource
