

Chapter 7 Energy  
Conservation of Energy—continued

2. The woman supports a 100-N load with the friction-free pulley systems shown below. Fill in the scale readings that show how much force she must exert.

3. A 600-N block is lifted by the friction-free pulley system shown.

a. How many strands of rope support the 600-N weight?  
6

b. What is the tension in each strand?  
100 N

c. What is the tension in the end held by the man?  
100 N

d. If the man pulls his end down 60 cm, how many cm will the weight rise?  
10 cm

e. If the man does 60 J of work, what will be the increase of PE of the 600-N weight?  
the same, 60 J

4. Why don't balls bounce as high during the second bounce as they do in the first bounce?

Some of the ball's energy is transferred into sound and heat, therefore PE decreases.

Can you see how the conservation of energy applies to all changes in nature?

Paul Hewitt's best selling text continues to be the benchmark book that two thirds of professors use and by which all others are judged. In *Conceptual Physics Eleventh Edition* Paul Hewitt shows how a compelling text and the most advanced media can be integrated to empower professors as they bring physics to life for non science majors both in and out of class. For the Eleventh Edition Hewitt helps students connect physics to their everyday experiences and the world around them and provides additional help on solving mathematical problems. Hewitt's text is famous for engaging students with analogies and imagery from real world situations that build a strong conceptual understanding of physical principles ranging from classical mechanics to modern physics. With this strong foundation students are better equipped to understand the equations and formulas of physics and are motivated to explore the thought provoking exercises and fun projects in each chapter. The new edition features a fresh new design content that is more focused on physics applications and updated pedagogical features.
