

The background of the cover is a vibrant, circular microscopic image. It features a central white circle containing the title and author information. Surrounding this circle is a ring of yellow and blue structures, possibly representing a cell wall or a specific type of microorganism. The outermost ring is a complex, multi-colored pattern of red, orange, and blue, suggesting a diverse microbial environment. The overall aesthetic is scientific and visually striking.

"Beyond fascinating. An amazing book. It'll change the way you think about the world. It'll change who you think you are."

Contain Multitudes Microbes Within Grander:

I Contain Multitudes Ed Yong, 2016-08-09 The microbes in our bodies are part of our immune systems and protect us from disease In the deep oceans mysterious creatures without mouths or guts depend on microbes for all their energy Bacteria provide squid with invisibility cloaks help beetles to bring down forests and allow worms to cause diseases that afflict millions of people Many people think of microbes as germs to be eradicated but those that live with us the microbiome build our bodies protect our health shape our identities and grant us incredible abilities In this astonishing book Ed Yong takes us on a grand tour through our microbial partners and introduces us to the scientists on the front lines of discovery It will change both our view of nature and our sense of where we belong in it **A Gardener's Guide to Botany** Scott Zona, 2022-12-06 A fascinating look at the inner workings of the plant kingdom written for gardeners **Eden's Endemics** Elizabeth Callaway, 2020-08-04 In the past thirty years biodiversity has become one of the central organizing principles through which we understand the nonhuman environment Its deceptively simple definition as the variation among living organisms masks its status as a hotly contested term both within the sciences and more broadly In Eden's Endemics Elizabeth Callaway looks to cultural objects novels memoirs databases visualizations and poetry that depict many species at once to consider the question of how we narrate organisms in their multiplicity Touching on topics ranging from seed banks to science fiction to bird watching Callaway argues that there is no set generally accepted way to measure biodiversity Westerners tend to conceptualize it according to one or more of an array of tropes rooted in colonial history such as the Lost Eden Noah's Ark and Tree of Life imagery These conceptualizations affect what kinds of biodiversities are prioritized for protection While using biodiversity as a way to talk about the world aims to highlight what is most valued in nature it can produce narratives that reinforce certain power differentials with real life consequences for conservation projects Thus the choices made when portraying biodiversity impact what is visible what is visceral and what is unquestioned common sense about the patterns of life on Earth **German Graphic Narratives and Trauma** Elisabeth Krimmer, Maureen Burdock, 2025 This volume explores the representation of political racial sexual and environmental trauma in German language graphic narratives which has thus far received little scholarly attention In recent decades as graphic novels have exploded in popularity and have increasingly been engaged with by scholarship there has been a marked increase in comics that deal with traumatic experiences These experiences arise variously from warfare genocide terrorism racism sexual violence domestic violence illness disability migration natural disasters or climate change among other causes Indeed scholars including Hillary Chute and Gillian Whitlock have argued that graphic narratives are particularly well suited to portraying traumatic experiences through the lens of individual memories This edited volume builds on the emergent body of work on the representation of trauma in graphic narratives but focuses exclusively on German language graphic narratives whose exploration of trauma has so far received little scholarly attention Essays dealing with theoretical and conceptual

Entangled and Empowered: Agency in Multispecies Communities Keri Stevenson ,2025-08-19 Entangled and Empowered Agency in Multispecies Communities is a collection that approaches the inevitable reality of entanglement between humans and other beings from a perspective of action and wonder It argues that actors as diverse as bacteria snakes butterflies ducks and cacao trees can help us enact joy in fields as different as art cinema literature and anthropology While acknowledging the imminent reality of climate change the sixth extinction and other overwhelming threats to the Earth this book argues that humans continue to live and so do the

beings whose lives are entwined with ours for whom we can acknowledge and work to improve their existence The nine essays in this volume trace that acknowledgment and work through three sections centered on visual media queer and feminist readings of empowerment and movements beyond the boundaries enacted by anthropocentric Western society Drawing on theories such as new materialism posthumanism and ecofeminism and with an international perspective from authors working at American South Asian and East Asian universities Entangled and Empowered finds hope in the shadow of despair It engages with work by Anna Lowenhaupt Tsing on entanglement Donna Haraway on kin making and multispecies communities and Karen Barad on intra actions among others while also showing how critiques of these ideas can make the world both more promising and more endangered This collection will be useful for scholars working in all subfields of environmental humanities especially those intersecting with the theories described above and as an archive of examples analyzing practical aspects of agency in diverse multispecies communities Scholars studying texts as well known as The Handmaid s Tale and as obscure as the codices of the Mopan Maya will find value in having both under one cover

Diary of a Detour Lesley Stern, 2020-08-10 Diary of a Detour is film scholar and author Lesley Stern s memoir of living with chronic lymphocytic leukemia She chronicles the fears and daily experience of coming to grips with an incurable form of cancer by describing the dramas and delving into the science Stern also nudges cancer off center stage by turning to alternative obsessions and pleasures In seductive writing she describes her life in the garden and kitchen the hospital and the library and her travels down the street to her meditation center across the border to Mexico and across the world to Australia Her immediate world is inhabited with books movies politics and medical reports that provoke essayistic reflections As her environment is shared with friends chickens a cat called Elvis mountain goats whales lions and microbes the book opens onto a larger than human world Intimate and meditative engrossing and singular Diary of a Detour offers new ideas about what it might mean to live and think with cancer and with chronic illness more broadly
