Neutrosophic Sets and Systems, Vol. 83, 2025 Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, Volume 83 of Neutrosophic Sets and Systems features a diverse collection of research applying neutrosophic theory to address complex challenges across various fields including information science engineering and healthcare The papers in this volume present new models and methodologies that effectively handle uncertainty indeterminacy and imprecision Significant theoretical contributions include the exploration of concepts like Neutrosophic Metric Spaces Fermatean Neutrosophic Graphs and SuperHyperSoft Sets along with their applications in fields like energy supply systems and fixed

point theorems The volume also highlights practical applications in multi criteria decision making MCDM for areas such as entrepreneurial education and civil litigation efficiency Furthermore research is presented on the use of neutrosophic logic with advanced technologies like deep learning and machine learning for tasks such as brain tumor medical image analysis and sleep disorder prediction The collection also includes studies on risk management digital media arts evaluation and natural language processing This volume demonstrates the expansive and evolving utility of neutrosophic theory in both foundational research and real world problem solving Engineering Mathematics Vol-II (Tamil Nadu) P. Kandasamy,K. Thilagavathi,K. Gunavathi,2006 *Alternative Water Supply Systems* Fayyaz Ali Memon,Sarah Ward,2014-10-15 Owing to climate change related uncertainties and anticipated population growth different parts of the developing and the developed world particularly urban areas are experiencing water shortages or flooding and security of fit for purpose supplies is becoming a major issue The emphasis on decentralized alternative water supply systems has increased considerably Most of the information on such systems is either scattered or focuses on large scale reuse with little consideration given to decentralized small to medium scale systems *Alternative Water Supply Systems* brings together recent research into the available and innovative options and additionally shares experiences from a wide range of contexts from both developed and developing countries *Alternative Water Supply Systems* covers technical social financial and institutional aspects associated with decentralized alternative water supply systems These include systems for greywater recycling rainwater harvesting recovery of water through condensation and sewer mining A number of case studies from the UK the USA Australia and the developing world are presented to discuss associated environmental and health implications The book provides insights into a range of aspects associated with alternative water supply systems and an evidence base through case studies on potential water savings and trade offs The information organized in the book is aimed at facilitating wider uptake of context specific alternatives at a decentralized scale mainly in urban areas This book is a key reference for postgraduate level students and researchers interested in environmental engineering water resources management urban planning and resource efficiency water demand management building service engineering and sustainable architecture It provides practical insights for water professionals such as systems designers operators and decision makers responsible for planning and delivering sustainable water management in urban areas through the implementation of decentralized water recycling Authors Fayyaz Ali Memon Centre for Water Systems University of Exeter UK and Sarah Ward Centre for Water Systems University of Exeter UK

Constant single valued neutrosophic graphs with applications Naeem Jan,Lemnaouar Zedam,Tahir Mahmood,Kifayat Ullah,Said Broumi,Florentin Smarandache, In this paper we introduced a new concept of single valued neutrosophic graph SVNG known as constant single valued neutrosophic graph CSVNG Basically SVNG is a generalization of intuitionistic fuzzy graph IFG More specifically we described and explored some graph theoretic ideas related to the introduced concepts of CSVNG An application of CSVNG in a Wi Fi network system is discussed and a comparison of CSVNG with constant IFG is established showing the worth of the proposed work Further several terms like constant function and totally constant function are investigated in the frame work of CSVNG and their characteristics are studied
