Semiotic Principles in Semantic Theory Neal R. Norrick,1981-01-01 This study represents a contribution to the theory of meaning in natural language It proposes a semantic theory containing a set of regular relational principles These principles enable semantic theory to describe connections from the lexical reading of a word to its figurative contextual reading from one variant reading of a polysemous lexical item to another from the idiomatic to its literal reading or to the literal reading s of one or more of its component lexical items Semiotic theory provides a foundation by supplying principles defining motivated expression content relations for signs generally The author argues that regular semantic relational principles must derive from such semiotic principles to ensures the psychological reality and generality of the semantic principles
