The World is experiencing an information knowledge revolution that is fundamentally transforming how human activities are carried out. The computer plays a vital role in the development of any company it also saves some of the complex problems that are been faced by man and processes voluminous data within a short time or at an incredible speed (Kumar, 2016).

The rapid advancement of mobile technology has significantly transformed various aspects of our lives, including how we engage in commerce and interact within our communities. College and university students, in particular, form a vibrant and dynamic community that often requires a convenient and efficient platform to buy, sell, and trade items within their local campus environment. Traditional methods of classified advertisements and physical bulletin boards are no longer adequate to meet the diverse needs and preferences of modern students.

The emergence of mobile applications has opened up new possibilities for facilitating peer-to-peer transactions and fostering community engagement among students. The

Esposito,Derya Iner,2018-10-13 While the themes of radicalization and Islamophobia have been broadly addressed by academia to date there has been little investigation of the crosspollination between the two Is Islamophobia a significant catalyst or influence on radicalization and recruitment How do radicalization and Islamophobia interact operate feed one another and ultimately pull societies toward polar extremes in domestic and foreign policy The wide ranging and global contributions collected here explore these questions through perspectives grounded in sociology political theory psychology and religion The volume provides an urgently needed and timely examination of the root causes of both radicalization and Islamophobia the cultural construction and consumption of radical and Islamophobic discourses the local and global contexts that fertilize these extreme stances and finally the everyday Muslim in the shadow of these opposing but equally vociferous forces Analytical NMR L.
