# Visual Basic .NET

Visual Basic .NET is a new version of the Visual Basic programming language. It is designed to be a more powerful and flexible language than the original Visual Basic. It is also designed to be more compatible with other .NET languages, such as C# and J#. Visual Basic .NET is a managed language, which means that it is compiled into a single file called a DLL. This makes it easier to distribute and use applications written in Visual Basic .NET. Visual Basic .NET is also a type-safe language, which means that the compiler will catch errors that would otherwise go undetected. This makes Visual Basic .NET a more reliable language for developing applications.
