Our Posthuman Future:

Our Posthuman Future Francis Fukuyama, 2003-05 A social philosopher examines how the foundation of liberal democracy which is the belief that all human beings are equal by nature could be shattered by the biotechnology revolution

Our Posthuman Past David Edward Rose, 2021-06-09 Technological advances directly affect the human being's material existence and its self understanding The Enlightenment's intentional agent is due to specific technologies undergoing a fundamental transformation Yet if the ideological basis of this understanding the justness of social luck is not rejected then a new understanding of the subject which would avoid unfreedom in the territorialization of the digital world is made impossible This book offers a novel Hegelian reading of the posthuman discipline in order to propose a new subjectivity

Screening the Posthuman Missy Molloy, Pansy Duncan, Claire Henry, 2023 From AI to climate change recent technological ecological and cultural transformations have unsettled established assumptions about the relationship between the human and the more than human world Screening the Posthuman addresses a heterogeneous body of twenty first century films that turn to the figure of the posthuman as a means of exploring this development Through close analyses of films as diverse as *Kikou* dir Hirokazu Koreeda 2009 *Testrol* dir Ilekrol On Body and Soul dir Ildiko Enyedi 2017 and *Nomadland* dir Chlo Zhao 2020 this wide ranging volume shows that while often identified as the remit of science fiction the posthuman on screen crosses filmic genres national contexts and industrial settings In the process posthuman cinema emphasizes humanity's entanglement in broader biological technological and social worlds and exposes new models of subjectivity community and desire In advancing these arguments Screening the Posthuman draws on scholarship associated with critical posthumanist theory an ongoing project unified by a decentering of the human As the first systematic full length application of this body of scholarship to cinema Screening the Posthuman advocates for a rigorous posthumanist critique that avoids both humanist nostalgia and transhumanist fantasy in its attention to the excitements and anxieties of posthuman experience

Aldous Huxley Alessandro Maurini, 2017-01-30 Aldous Huxley *The Political Thought of a Man of Letters* argues that Huxley is not a man of letters engaged in politics but a political thinker who chooses literature to spread his ideas His preference for the dystopian genre is due to his belief in the tremendous impact of dystopia on twentieth century political thought His political thinking is not systematic but this does not stop his analysis from supplying elements that are original and up to date and that represent fascinating contributions of political theory in all the spheres that he examines from anti Marxism to anti positivism from political realism to elitism from criticism of mass society to criticism of totalitarianism from criticism of ideologies to the future of liberal democracy from pacifism to ecological communitarianism Huxley clearly grasped the unsolved issues of contemporary liberalism and the importance of his influence on many twentieth century and present day political thinkers ensures that his ideas remain indispensable in the current liberal democratic debate *Brave New World* is without doubt Huxley's most successful political manifesto While examining the impassioned struggle for the development of

all human potentialities it yet manages not to close the doors definitively on the rebirth of utopia in the age of dystopia

Liberal Democracy as the End of History Christopher Hughes, 2011-10-07 Francis Fukuyama claims that liberal democracy is the end of history This book provides a theoretical re examination of this claim through postmodernist ideas The book argues that postmodern ideas provide a valuable critique to Fukuyama s thesis and poses the questions can we talk about a universal and teleological history a universal human nature or an autonomous individual It addresses whether postmodern theories concerning the movement of time what it means to be human and what it means to be an individual subject can be accommodated within a theory of a history that ends in liberal democracy The author argues that incorporating elements of postmodern thought into Fukuyama s theory makes it possible to produce a stronger and more compelling account of the theory that liberal democracy is the end of history The result of this is to underpin Fukuyama s theory with a more complex understanding of the movement of time the human and the individual and to show that postmodern concepts can paradoxically be used to strengthen Fukuyama s theory that the end of history is liberal democracy The book will be of interest to students and scholars of political theory postmodernism and the work of Francis Fukuyama

The American Spectator ,2002 **The Ecologist** ,2002 **Nanoculture** N. Katherine Hayles,2004 Nano denotes a billionth a nanometer is a billionth of a meter New instrumentation and techniques have for the first time made possible materials research and engineering at this level the scale of individual molecules and atoms Extraordinary visions of material abundance unprecedented materials and powerful engineering capabilities have marked the arrival of nanotechnology as well as dystopian scenarios of self replicating devices running amok and causing global catastrophe Largely a future possibility rather than present actuality nanotechnology has become a potent cultural signifier NanoCulture explores the ways in which nanotechnology interacts with and itself becomes a cultural construction Topics include the co construction of nanoscience and science fiction the influence of risk assessment and nanotechnology on the shapes of narratives intersections between nanoscience as a writing practice and experimental literature at the limits of fabrication the Alice in Wonderland metaphor for nanotechnology and the effects of mediation on nanotechnology and electronic literature NanoCulture is produced in collaboration with the nano art exhibit at the Los Angeles County Museum of Art December 2003 September 2004 created by an interdisciplinary team led by media artist Victoria Vesna and nanoscientist James Gimzewski NanoCulture is richly illustrated with images from the nano exhibit which also provides the basis for an ethnographic analysis of collaborative process and an exploration of changing concepts of museum space The dynamic uniting these diverse perspectives is boundary crossing between art science and literature cultural imaginaries scientific facts and technological possibilities actual virtual and hybrid spaces the science of fictions and the fictions of science and utopian dreams material constraints and dystopian nightmares The first book length study focus on cultural implications of nanotechnology NanoCulture breaks new ground in showing the importance of the new technoscience to contemporary

culture and of culture to the development interpretation and future of this technoscience

A Cultural History of Animals: In the modern age Linda Kalof, Brigitte Pohl-Resl, 2007 Choice Outstanding Academic Title 2008 HARDBACK SET
A Cultural History of Animals is a multi volume project on the history of human animal relations from ancient times to the present The set of six volumes covers 4500 years of human animal interaction Volume 1 Antiquity to the Dark Ages 2500BC 1000AD Volume 2 The Medieval Age 1000 1400 Volume 3 The Renaissance 1400 1600 Volume 4 The Enlightenment 1600 1800 Volume 5 The Age of Empire 1800 1920 Volume 6 The Modern Age 1920 2000 including a discussion of animals of the future As the same issues are central to animal human relations throughout history each volume shares the same structure with chapters in each volume analysing the same issues and themes In this way each volume can be read individually to cover a specific period and individual chapters can be read across volumes to follow a theme across history Each volume explores the sacred and the symbolic totem sacrifice status and popular beliefs hunting domestication taming breeding labour and companionship entertainment and exhibitions the menagerie zoos circuses and carnivals science and specimens research education collections and museums philosophical beliefs and artistic representations The full six volume set combines to present the most authoritative and comprehensive survey available on animals through history INDIVIDUAL VOLUMES AVAILABLE The Nation ,2002 *Public Science in Liberal Democracy* Peter W. B. Phillips, Jene M. Porter, 2007 Regardless of whether science is practised in industry the academy or government its conduct inescapably shapes and is shaped by democratic institutions Moreover the involvement of science with public policy formation and democracy has dramatically increased over the centuries and by all accounts will continue to do so In order to understand the functioning of science and democracy it is necessary to acknowledge the complex relationship between them Public Science in Liberal Democracy aims to do this from an interdisciplinary perspective presenting an array of substantively different positions on the issues that it explores The volume focuses on three major questions Can science retain independence and objectivity in the face of demands to meet commercial and public policy objectives In what ways is scientific discourse privileged in the formation of public policy How can scientific knowledge and methodology be made compatible with the interdisciplinarity and integration required of public policy formation and discourse Representing a wide range of viewpoints the contributors to Public Science in Liberal Democracy come from Canada Europe the United States and Australia and include practising scientists as well as scholars working in the humanities and social sciences This timely and thought provoking collection makes an important contribution to the literature and will appeal to anyone interested in scientific research and its political and philosophical ramifications in democratic society

Humanitarian Decade United Nations. Office for the Coordination of Humanitarian Affairs, 2004 To mark the tenth anniversary of Resolution 46 182 Strengthening the coordination of humanitarian assistance of the United Nations a seminar was arranged to discuss its successes and challenges The proceedings of that seminar are published in volume one of this publication Volume two contains a series of papers that were commissioned to comment on the themes that emerged from the seminar It contains the perspectives of individuals and institutions donor and developing countries the NGO community and academics Western American Literature ,2011 **Science and Ethics** Paul Kurtz, David Koepsell, 2007-06-05 This volume presents a unique collection of authors who generally maintain that science can help us make wise choices and that an increase in scientific knowledge can help modify our ethical values and bring new ethical principles into social awareness

Beyond Therapy President's Council on Bioethics (U.S.), 2003-12-02 A groundbreaking new exploration of the promises and perils of biotechnology and the future of American society Biotechnology offers exciting prospects for healing the sick and relieving suffering But because our growing powers also enable alterations in the workings of the body and mind they are becoming attractive to healthy people who would just like to look younger perform better feel happier or become more perfect This landmark book the product of more than sixteen months of research and reflection by the members of the President's Council on Bioethics explores the profound ethical and social consequences of today's biotechnical revolution Almost every week brings news of novel methods for screening genes and testing embryos choosing the sex and modifying the behavior of children enhancing athletic performance slowing aging blunting painful memories brightening mood and altering basic temperaments But we must not neglect the fundamental question Should we be turning to biotechnology to fulfill our deepest human desires We want better children but not by turning procreation into manufacture or by altering their brains to gain them an edge over their peers We want to perform better in the activities of life but not by becoming mere creatures of chemistry We want longer lives but not at the cost of becoming so obsessed with our own longevity that we care little about future generations We want to be happy but not by taking a drug that gives us happy feelings without the genuine loves attachments and achievements that are essential to true human flourishing As we enjoy the benefits of biotechnology members of the council contend we need to hold fast to an account of the human being seen not in material or mechanistic or medical terms but in psychic moral and spiritual ones By grasping the limits of our new powers we can savor the fruits of the age of biotechnology without succumbing to its most dangerous temptations Beyond Therapy takes these issues out of the narrow circle of bioethics professionals and into the larger public arena where matters of this importance rightly belong **Library Journal** ,2001
