Togay Koralturk,2016 Cool Cities Benjamin R. Barber,2017-04-24 A pointed argument that cities not nation states can and must take the lead in fighting climate change Climate change is the most urgent challenge we face in an interdependent world where independent nations have grown increasingly unable to cooperate effectively on sustainability In this book renowned political theorist Benjamin R Barber describes how cities by assuming important aspects of sovereignty can take the lead from faltering nation states in fighting climate change Barber argues that with more than half the world s population now in urban areas where 80 percent of both GDP and greenhouse gas emissions are generated cities are the key to the future of democracy and sustainability In this compelling sequel to If Mayors Ruled the World Barber assesses both broad principles of urban rights and specific strategies of sustainability such as fracking bans walkable cities above ground mining of precious resources energy and heating drawn from garbage incineration downtown wind turbines and skyscrapers built from wood He shows how cities working together on climate change despite their differences in wealth development and culture can find common measures by which to evaluate the radically different policies they pursue This is a book for a world in which bold cities are collaborating to combat climate change and inspire hope for democracy even as reactionary populists take over national governments in the United States and Europe It calls for a new social contract among citizens and municipalities to secure not only their sustainability but their survival USGBC LEED Green Associate Study Guide U.S. Green Building Council,2009 This study guide is a resource to help you prepare for the LEED Green Associate Examination It summarizes the critical points of green design construction and operations To help you master its content the guide has been packaged with the Green Building and LEED Core Concepts Guide one of the reference documents for the LEED Green Associate Exam Within each category of the guide

Togay Koralturk, 2015-11-09 PASS THE LEED GREEN ASSOCIATE EXAM WITH FLYING COLORS Having been widely adopted as the primary course material for bachelor's and master's degree classes in architecture and civil engineering in the universities all over the United States the LEED Green Associate V4 Exam Complete Study Guide provides deep insight into the principles of green building and helps the reader to learn rather than to memorize the essential information for the exam Thus this approach equips candidates to successfully pass the LEED Green Associate exam with flying colors in order to actively apply green building and LEED principles in real life This book is the only resource a candidate needs in order to successfully pass the exam As LEED v4 is quite different in comparison to the former versions the book was entirely re-written thus it was not updated from a previous edition All of the chapters contain guidance on the aspects that require extensive attention while the book points out the finer details to focus on for the exam purposes It does not matter how much time passes after taking the exam as learning the real reasons behind the green building and LEED principles through observation will help to consolidate this information concisely Even though the LEED Green Associate exams are sometimes referred to as conceptual exams in reality the exam goes well beyond that Without diving into the LEED prerequisites and credits a candidate cannot ever guarantee passing the test as a result the book covers the core concepts of each LEED credit category and then evaluates the LEED prerequisites and credits to demonstrate how those green building concepts turn into real projects with LEED requirements Pass the LEED Green Associate exam with flying colors Thoroughly understand and apply the green building principles for life and retain all the information you have learned

Apply the green building and LEED principles in real life Know all the important things to consider during the exam beforehand The book is also recommended for students professionals and anyone who has not chosen to take an LEED professional exam but nonetheless retains a strong interest in LEED and green buildings *USGBC LEED Green Associate Study Guide* ,2009 This study guide is a resource to help you prepare for the LEED Green Associate Examination It summarizes the critical points of green design construction and operations To help you master its content the guide has been packaged with the Green Building and LEED Core Concepts Guide one of the reference documents for the LEED Green Associate Exam Within each category of the guide you will find a variety of study tools including category reviews review questions and worksheets learning activities and practice questions P 1
