Abstract

This note, points out how Fletcher and Natarajan's zero point method for the class of linear transportation problems can be improved. This simple modification is an improved zero point method (IZPM) for solving both Crisp and Fuzzy transportation problems. This modification could result in an optimal solution. Further comparative study among the new technique and the other existing transportation algorithms are established by means of sample problems.

Mathematics Subject Classification: 90B06, 90C08.

Key words: Transportation problem, Improved Zero Point Method (IZPM).

INTRODUCTION

Vogel's Approximation method for a balanced transportation problem starts with the calculation of penalties (the difference between the lowest bid/costs and the first minimum cost) for all rows and columns. There is always an entry which is possible to
