organizations to rapidly adopt remote and hybrid working models As we emerge from the lockdown hybrid working has become a permanent fixture in many industries However the shift has created uncertainty for both employees and employers While many workers demand flexible working conditions organizations are grappling with how to maintain collaboration innovation and organizational cohesion in a more fragmented environment This book explores these dynamics focusing on the ongoing challenges and opportunities brought about by hybrid work arrangements The rise of artificial intelligence AI introduces a second layer of complexity to the workplace With the potential to transform job roles workflows and even decision making processes AI presents both opportunities and risks This volume brings together experts in organizational development to examine how AI is reshaping the future of work Contributors will discuss how these changes are impacting career trajectories employee engagement and the traditional structures of organizational development Through a mix of theoretical insights and practical case studies this book offers a comprehensive exploration of how hybrid working and AI are shaping the future of organizations Providing valuable insights into navigating these transformative shifts this volume will be of great interest to researchers academics practitioners and those interested in the evolving world of work

Flexible Integration and Efficient Analysis of Multidimensional Datasets from the Web Kaempgen, Benedikt, 2015-09-23 If numeric data from the Web are brought together natural scientists can compare climate measurements with estimations financial analysts can evaluate companies based on balance sheets and daily stock market values and citizens can explore the GDP per capita from several data sources However heterogeneities and size of data remain a problem This work presents methods to query a uniform view the Global Cube of available datasets from the Web and builds on Linked Data query approaches

Prenatal Environmental and Genetic Interactions: An Exploration from Fetal Development to Child Health Xin Li, Tianjiao Liu, Yalan Li, Xue Xiao, Ting Hu, 2026-01-13 The development of a child begins during pregnancy when prenatal environmental factors and genetic influences interact to shape fetal development and long term health outcomes Increasing evidence suggests that maternal nutrition exposure to toxins and maternal health conditions can have profound effects on fetal growth metabolism and immune system development These environmental influences interact with genetic predispositions and epigenetic modifications which in turn affect fetal development and contribute to a range of childhood disorders Understanding the intricate relationships between these factors is crucial for uncovering the developmental origins of health and disease While basic research has provided valuable insights into these interactions integrating clinical findings with genetic and epigenetic data remains essential for developing comprehensive strategies for prevention and treatment This research topic explores these complex interactions aiming to enhance our understanding of how prenatal factors influence both short term fetal health and long term child development The goal of this research topic is to provide a comprehensive review of the interactions between prenatal environmental factors and genetic influences on fetal development and child health outcomes By integrating findings from basic research and clinical studies the aim is to elucidate the mechanisms

underlying these interactions and identify potential avenues for early intervention The topic will explore how maternal health nutrition and environmental exposures interact with genetic factors and epigenetic modifications to influence child health offering insights into preventive and therapeutic strategies for fetal and childhood disorders This research topic welcomes original research reviews clinical studies and case reports that explore the complex interactions between prenatal environmental factors and genetic influences Authors are encouraged to submit articles that examine the impact of maternal nutrition toxin exposure maternal health conditions and genetic predispositions on fetal development and child health Submissions should provide new insights into the mechanisms that link prenatal factors to childhood health outcomes offering potential strategies for early intervention and precision medicine Studies that integrate genetic epigenetic and environmental data are especially encouraged Contributions should focus on advancing the understanding of the developmental origins of health and disease with an emphasis on improving preventive and therapeutic approaches for both fetal and childhood disorders
