**Introduction to Reliability and Quality Engineering** John P. Bentley, 1999 Suitable for students of all engineering disciplines and professional engineers alike this interdisciplinary and user friendly text will enable the reader to apply the principles of quality and reliability to manufacturing processes and engineering systems *Frontiers in Statistical Quality Control 13* Sven Knoth, Wolfgang Schmid, 2021-05-15 This contributed book focuses on major aspects of statistical quality

control shares insights into important new developments in the field and adapts established statistical quality control methods for use in e.g. big data network analysis and medical applications. The content is divided into two parts: the first of which mainly addresses statistical process control, also known as statistical process monitoring. In turn, the second part explores selected topics in statistical quality control, including measurement uncertainty analysis and data quality. The peer-reviewed contributions gathered here were originally presented at the 13th International Workshop on Intelligent Statistical Quality Control (ISQC 2019) held in Hong Kong on August 12-14, 2019. Taken together, they bridge the gap between theory and practice, making the book of interest to both practitioners and researchers in the field of statistical quality control.

**Quality and Reliability Engineering**, 1997      **Frontiers in Statistical Quality Control 11** Sven Knoth, Wolfgang Schmid, 2015-04-24. The main focus of this edited volume is on three major areas of statistical quality control: statistical process control (SPC), acceptance sampling, and design of experiments. The majority of the papers deal with statistical process control, while acceptance sampling and design of experiments are also treated to a lesser extent. The book is organized into four thematic parts: Part I addresses statistical process control, Part II is devoted to acceptance sampling, Part III covers the design of experiments, while Part IV discusses related fields. The twenty-three papers in this volume stem from the 11th International Workshop on Intelligent Statistical Quality Control, which was held in Sydney, Australia, from August 20 to August 23, 2013. The event was hosted by Professor Ross Sparks, CSIRO Mathematics, Informatics, and Statistics, North Ryde, Australia, and was jointly organized by Professors S. Knoth, W. Schmid, and Ross Sparks. The papers presented here were carefully selected and reviewed by the scientific program committee before being revised and adapted for this volume.
