The book highlights the disruption of traditional banking, as well as the risks of fintech and regulatory technology. Hsu and Li describe major companies, including Alipay and Tencent, developer of WeChat Pay, and a wealth management business, and other leading fintech firms, such as Creditease, Zhong An Insurance, and JD Finance. *Fintech Finance and Financial Fragility -- Focusing on China* Rose Neng Lai, 2017. Financial Technology (Fintech) is evolving quickly within the financial system, giving rise to new forms of lending and opening up a version of shadow banking. This is particularly true in China. While fintech finance and shadow banks can improve a banking system, they can also become new sources of fragility. This paper aims to provide a theoretical analysis of risks of fintech finance to financial sectors, with particular examples for China. These risks are most likely to be important when fintech moves beyond its technological focus and performs financial intermediation, particularly bank-like functions. We provide implications for the evolution of fintech finance as new sources of payments and funding. We propose ring-fencing as an approach to mitigate risks from contagion. **Recent Development of Fintech Regulation in China** Chuanman You, 2018. FinTech innovation
