expanded horizons but the cost has been very high in terms of damage to the environment and the consumption of precious resources. Despite the growing belief that a Faustian price is now being paid for the freedom cars have bestowed on us, we are none the less manufacturing them in ever greater numbers. *Autopia* is the first book to explore the culture of the motor car in the widest possible sense. Featuring newly commissioned essays by writers, critics, historians, artists, and film makers as well as reprinting key texts, it examines the effect of the car throughout the world, including the USA, Western and Eastern Europe, Japan, China, Cuba, India, and South Africa. In this book, the car is treated neither as a technological fetish object nor as an instrument of danger. Instead, it is examined as a hugely important determinant of 20th century culture, neither wholly good nor an unmitigated disaster, and certainly endlessly fascinating. Contributors include Michael Bracewell, Ziauddin Sardar, Al Rees, Martin Pawley, Donald Richie, and Peter Hamilton. Key texts by Marshall Berman, Jane Jacobs, Roland Barthes, Marc Auge, and others.

**Strategic Management and Business Analysis** David Williamson, Peter Cooke, Wyn Jenkins, Keith Michael Moreton, 2013-05-13. Strategic Business Analysis shows students how to carry out a strategic analysis of a business with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues, especially useful for students involved with case study analysis. Accompanying the text is a CD Rom containing the models, tutorial guidance, and a PowerPoint presentation. A blank template is provided for each model, enabling students to actively interact and enter their own data, an effective what-if facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.
