

A dragonfly is shown in flight, moving from the upper right towards the center. Its wings are translucent and show some yellowish-brown patterns. Below it, a lily pad is partially visible, with its stem extending from the bottom left. The background is a dark, moody green, suggesting a pond at dusk or dawn.

Physics Education and Gender Allison J. Gonsalves, Anna T. Danielsson, 2020-04-24 This Edited Volume engages with concepts of gender and identity as they are mobilized in research to understand the experiences of learners teachers and practitioners of physics The focus of this collection is on extending theoretical understandings of identity as a means to explore the construction of gender in physics education research This collection expands an understanding of gendered participation in physics from a binary gender deficit model to a more complex understanding of gender as performative and intersectional with other social locations e g race class LGBT status ability etc This volume contributes to a growing scholarship using sociocultural frameworks to understand learning and participation in physics and that seeks to challenge dominant understandings of who does physics and what counts as physics competence Studying gender in physics education research from a perspective of identity and identity construction allows us to understand participation in physics cultures in new ways We are able to see how identities shape and are shaped by inclusion and exclusion in physics practices discourses that dominate physics cultures and actions that maintain or challenge structures of dominance and subordination in physics education The chapters offered in this book focus on understanding identity and its usefulness in various contexts with various learner or practitioner populations This scholarship collectively presents us with a broad picture of the complexity inherent in doing physics and doing gender

College Physics Randall Dewey Knight, Brian Jones, Stuart Field, 2023 In 2006 we published *College Physics A Strategic Approach* a new algebra based physics textbook for students majoring in the biological and life sciences architecture natural resources and other disciplines As the first such book built from the ground up on research into how students can more effectively learn physics it quickly gained widespread critical acclaim from professors and students alike For this fourth edition we have continued to build on the research proven instructional techniques introduced in the first edition while working to make the book more useful for instructors more relevant to the students who use it and more connected to the other subjects they study
