Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30

With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them

Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8

The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards

This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers

The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science

They are also grouped by type core materials supplementary units and science activity books

Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information

The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide

The criteria reflect and incorporate goals and principles of the National Science Education Standards

The annotations designate the specific content standards on which these curriculum pieces focus

In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science

Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students

Another section features institutional resources

One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences

Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance

Authoritative extensive and thoroughly indexed and the only guide of its kind

Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents
