Progress Note			
<p>Helen continues to struggle with focussing during meetings and completing tasks required of her. She has made good steps to incorporating exercise and healthy diet into her routine, but still struggles with listening comprehension, remaining focussed, keeping track of time and executive function.</p> <p>Her side effects have been minimal and have eased off in the past week, so I recommend we increase methylphenidate dose and review in the next session- particularly to review development of "rebound" symptoms in late afternoon.</p>
