**Q. 1. What do you mean by Software ?**

Ans. **Software** : Sometimes abbreviated as SW and S/W, software is a collection of instructions that enable the user to interact with a computer, its hardware, or perform tasks. Without software, computers would be useless. For example, without your Internet browser, you could not surf the Internet or read this page and without an operating system, the browser could not run on your computer. The picture to the right shows a Microsoft Excel box, an example of a spreadsheet software program.

Q. 2. Explain Program versus Software.

Ans. **Program Versus Software**

Software is more than programs. It consists of programs, documentation of any facet of the program and the procedures used to setup and operate the software system. The components of the software systems are shown in Fig.

Software = Program + Documentation + Operating Procedures

Fig. : Components of software

Any program is a subset of software and it becomes software only if documentation and operating procedure manuals are prepared. Program is a combination of source code and object. Documentation consists of different types of manuals and shown Fig.

Operating procedures consist of instructions to setup and use the software system and instructions on how to react to system failure.
