Osif,2011-08-09 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information  
is everywhere However there is information and then there is correct appropriate and timely information While we might  
love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links on a topic  
engineers need the best information information that is evaluated up to date and complete Accurate vetted information is  
necessary when building new skyscrapers or developing new prosthetics for returning military veterans While the award  
winning first edition of Using the Engineering Literature used a roadmap analogy we now need a three dimensional analysis  
reflecting the complex and dynamic nature of research in the information age Using the Engineering Literature Second  
Edition provides a guide to the wide range of resources available in all fields of engineering This second edition has been  
thoroughly revised and features new sections on nanotechnology as well as green engineering The information age has  
greatly impacted the way engineers find information Engineers have an effect directly and indirectly on almost all aspects of  
our lives and it is vital that they find the right information at the right time to create better products and processes
